HOLIDAY WARMTH

Custom Fireplacing at Low Cost!

By making each Martin "Build-In-Anywhere" Fireplace a carefully engineered system, complete in itself with factory-built, hearth-to-chimney-top components that almost anyone can assemble and install, Martin has brought the woodburning fireplace within range of every budget.

Completely adaptable, Martin "Build-In-Anywhere" Fireplacing can be built into or out from any wall, installed in any corner, or made part of a room divider. Fireplaces are compatible with all standard construction methods, including manufactured module elements.

Because it is engineered for zero clearance, a Martin fireplace may be set directly on floor, sub-floor, or suitable constructed wooden platform. It requires no masonry foundation or clearance, and may be supported and surrounded with standard building materials. Multi-level installations are facilitated by a wide choice of roof termination options and the simplified use of chimney offsets.

(A) CONTEMPORARY FIREPLACE—37". Martin's new Cone Fireplace offers the advantages of a wider opening and an improved visual effect. Fire can be viewed and enjoyed from either side through a full 180 degree, Fireback-type ceramic hearth is extended for easy loading and has built-in ash retainer lip. Pipe and screen included. Matte Black finish, or by special order: Red, Avocado, Burnt Orange, or Harvest Gold.
Model #CW3600B Black $214.95
Model #CW3600B Colors $263.93

(B) WOODBURNING BUILD-IN FIREPLACE. "Build-In-Anywhere." Engineered for zero clearance. Within range of your budget.
Model #BW3845 Base Unit $279.00
*All accessories for installation available. See chart for parts and costs for your aire installation.
