INTRODUCING THE WORLD'S ONLY TURBO THAT GOES FASTER ON LESS GAS.
Until now, no turbo could deliver power and economy at the same time.
Because, to protect itself, it had to have its boost pressure limited at the factory.
Which, of course, limited its performance on the road.
The new Saab APC Turbo, on the other hand, automatically adjusts boost as you drive. The resulting increase in efficiency gives it what no other turbo has: better mileage and power. Simultaneously.
Plus throttle response unmatched by any other turbo on the road, which a short test drive will immediately demonstrate.
So, while all turbos are touted as giving better mileage and power, only the Saab APC Turbo actually does both at once.
Which, when you think of it, is the only way you'd really want it.
SAAB
