MANAGERIAL OPPORTUNITIES

We are an Ann Arbor manufacturer of industrial controls and seeking highly motivated individuals to fill the following managerial positions.

Manufacturing Manager

Qualified candidates must have 4 years manufacturing supervisory experience with printed circuit boards and electro-mechanical assemblies, knowledge of manufacturing operations and production planning and control methods. Must be a people oriented individual to interface with our non-union production personnel and be technically and administratively competent with good leadership qualities.

Personnel Manager

Qualified candidates will have 5 plus years as a personnel generalist with strong management skills and emphasis on technical recruiting and employee relations related to engineering and manufacturing environments connected with the electronics industry. Direct responsibilities include professional and technical recruiting, internal employee relations and communications, wage, salary, benefits and EEO program.

Product Manager

Qualified candidates will have a B.S.E.E. or B.S.C.S. or equivalent and prior product management or senior level applications engineering experience with programmable controllers and local area networks. Must have 4 years experience in the industrial computer/control marketplace. Responsibilities will include overall product management for a specific product line.

We provide an excellent salary, benefits and incentives package with opportunity for challenge and growth. Please submit your resume in confidence to:

An Equal Opportunity Employer

500 Help Wanted

Engineers and Programmers

Rapid growth at BNR Inc., in Ann Arbor, Michigan has created the opportunities for ambitious people to participate in the development of advanced data processing systems and their integration with telecommunications networks. Our reputation continues to grow and so does the opportunities for talented engineers and programmers. Begin now to build your career with one of the largest research and development organizations in North America. The following positions are available immediately:

Engineers

Senior Drafter
Minimum of two years experience in mechanical design or checking. Individual will work with engineering design requirements for prototype and production documentation.

Senior Design Engineer - Firmware
BSEE/MSEE or BSCS with 3-5 years experience in development of real time device control with microprocesor technology. Specific experience in rotating memories or communications and assembly language programming is desired.

Design Engineers - Analog
Positions available commensurate with experience for candidates with a BSEE, MSEE preferred, with a minimum of 2 years experience in one or more of the following areas: a) rotating memories, analog circuit design including read-write, data separator and servo electronics; b) printer analog circuit design including drives for print heads, carriage and paper feed devices; c) CRT display, development including knowledge of high voltage and deflection circuits, and regulated DC power supply circuits.

Design Engineers - Mechanical
BSME with a minimum of 2 years experience in computer mechanisms design with a strong background in vibrations and analytical stress analysis to work on designing high speed mechanisms.

Senior Engineers - Logic
Desire a BSEE or MSEE with a minimum of 4 years experience in system and digital design of commercial data processing systems. In depth experience in one or more of the following is necessary: memory system, microprocessor control applications, CRT display control, printer control, communications or computer architecture. Applicant should be a strong and self motivated individual contributor oriented toward cost effective development solutions.

Design Engineer - Diagnostics
Qualifications: BSEE or BSCS, 1-4 years experience in the following: Intel 8080/8085, assembly language or microprocessor background, hardware/software or firmware experience with a strong interest in testing of both hardware and software.

Programmers

Languages/Software Tools
Immediate need for entry-level programmers interested in the area of programming language development. Knowledge of and/or experience in the following areas would be helpful: structure of assemblers and linkage editors, interpreters and abstract machines, stack machine architecture, compiler design and implementation, code generation for microprocessors, etc.

Operating Systems/Utilities
Entry level programmers needed in the area of operating systems and utilities. A Bachelor's Degree in Computer Science is required with coursework in one or more of the following: operating systems design, compiler design, or systems programming.

Data Communications
Immediate openings for systems programmers with one to four years' experience in the areas of operating systems and communications systems. Familiarity with microprocessors or minicomputers is helpful. Experience with X25 networks, SNA development, or multi-tasking operating systems is highly desired.

On-Line Systems
Openings exist for system programmers in the compatible products group. Familiarity with BSC, SNA/SDLC or local channel communication protocols is highly desirable. Experience with communication systems would be helpful.

Our salaries are competitive and our benefit package is excellent. For immediate consideration, please forward resume with salary requirements to: BNR Inc., C. Williams, Manager, Human Resources, Mail Stop #5, 100 Phoenix Drive, Ann Arbor, Michigan 48106, (313) 973-4711.
