End Basement Flooding!

Install an Automatic Backwater Valve
Prevents Water in Floor Drains
From Backing Up!

This is how "DRAIN GUARD" works:

In normal position, drain water is always free to flow through "Drain Guard" into the sewer.

-BUT-

the instant any sewer water starts to back up, the rubber float rises and acts as a check valve to prevent any water from flooding basement.

Insure against flood damage with

Drain-Guard
