Basement Waterproofing

End Basement Flooding!

Install an Automatic Backwater Valve
Prevents Water in Floor Drains
From Backing Up!

This is how "DRAIN GUARD" works:

In normal position, drain water is always free to flow through "Drain Guard" into the sewer.

BUT

the instant any sewer water starts to back up, the rubber float rises and acts as a check valve to prevent any water from flooding basement.

Insure against flood damage with

Drain-Guard
