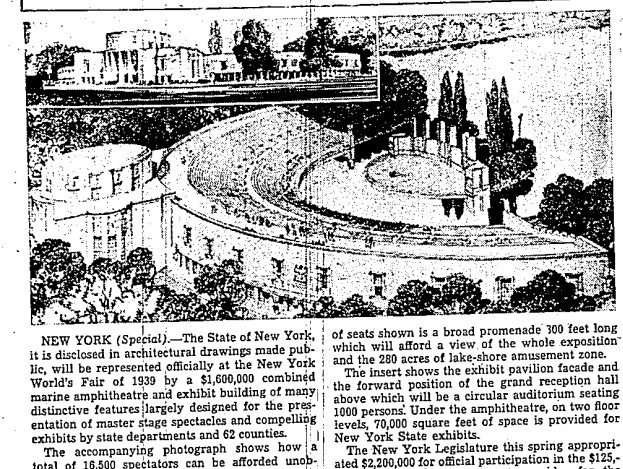
New York State to Erect $1,600,000 Amphitheatre at "Nation's Fair of 1939"



NEW YORK *(Special)*.—The State of New York, it is disclosed in architectural drawings made public, will be represented officially at the New York World's Fair of 1939 by a $1,600,000 combined marine amphitheatre and exhibit building of many distinctive features largely designed for the presentation of master stage spectacles and compelling exhibits by state departments and 62 counties.

The accompanying photograph shows how a total of 16,500 spectators can be afforded unobstructed view of an island stage of magnificent proportions set 100 feet off-shore in an exposition lagoon and to be screened, between acts, by sheets of water blown by compressed air from the lake and made doubly effective by the projection upon them of light and color. Above and behind the tier of seats shown is a broad promenade 300 feet long which will afford a view of the whole exposition and the 280 acres of lake-shore amusement zone.

The insert shows the exhibit pavilion facade and the forward position of the grand reception hall above which will be a circular auditorium seating 1000 persons. Under the amphitheatre, on two floor levels, 70,000 square feet of space is provided for New York State exhibits.

The New York Legislature this spring appropriated $2,200,000 for official participation in the $125,000,000 exposition. Enactment provides for the building, for a $250,000 exhibit and for $350,000 maintenance and operation. Contracts for construction of the dual purpose structure, a permanent addition to the site, will be let soon in public bidding by prequalified bidders.
