Dangerous 'Baking Powder'

The old story about the biscuits that were heavy because the cook mistook "bug powder" for baking powder is not so ridiculous as it sounds. Many serious accidents have resulted from carelessness with insecticides used in the home and garden.

Human Scape-Goats

Sin-eaters were believed to take upon themselves the sins of the dead by means of food and drink. In upper Bavaria sin-eating long survived. A corpse cake was placed on the breast of the deceased and then eaten by the nearest relative.

FUTURE NEEDS CALL FOR MORE NURSES

The National Nursing Council for War Service published figures as of September 15, 1944, estimating a shortage of 111,340 registered professional nurses for available positions on July 1, 1946. These figures took into account the 125,000 Cadet Nurses enrolled in 1944 and 1945. It also counted on military needs of 50,000. The military quota was later raised to 60,000.

For longer range planning, we have the statement of the Surgeon General of the U.S. Public Health Service that "Our best estimates based on actual nursing needs, indicate that the overall requirement of the predicted postwar population of 138,000,000 persons is 485,000 full time professional nurses. This is almost double the 1943 census of 245,345 available registered nurses."

Even though the war is over the military needs for nurses will remain relatively high for some time.

The Veterans Administration now needing 3,000 nurses will inevitably need many thousands more. It has been unofficially estimated that the case load of the Veterans' Administration will reach its peak of World War II aftermath in 1975.

Many nurses now being discharged from military services are not returning to their former jobs.
