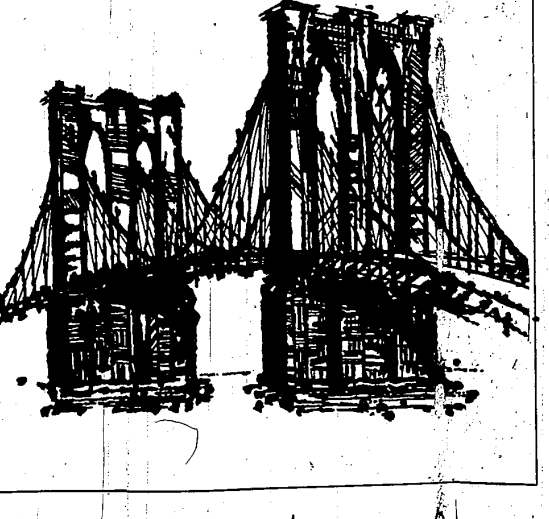
BRIDGE



We live in a world of bridges, most all of which are constructed of steel and cement. One of the most important bridges in today's world is still under construction, the bridge of understanding...between peoples and nations...spanning racial, economic, political and language barriers. Another is, when that bridge is the bridge of print...bringing people together in a buying and selling situation. The bridge is a newspaper ad.

An advertisement in your newspaper is uniquely suited to bringing people together quickly, economically and effectively. When you need to communicate with a crowd or if you have something to sell through a dealer, use the most convenient bridge available...the pages of your hometown newspaper.
