Summer Electricity Bills Likely to Soar

• **Plus, save a bundle on record-setting energy prices...**

Last winter, heating bills soared. Hundreds of customers demanded "high efficiency" systems and pocketed 20-40% savings as a result.

But now, the demand is increasing for summer. In fact just recently, U.S. Energy Secretary Spencer Abraham said,

"The problem will get worse, and blackouts (in some U.S. areas) appear inevitable." Ouch.

The Ugly Truth

This summer, you can count on sky-high bills to cool your home *and* price increases for efficient equipment. We've already had one increase with more to come!

That's when I had this really bright idea (to me anyway.)

Get Paid to Save

"Why not pay customers for their trade-ins to help train our techs?" If we *can't* use it, we'll donate it. Everybody wins.

Plus, your summer energy bills should drop like a rock (we're predicting 25-30%). Use those savings for a vacation.
