Some things work so well that nothing can take their place

BIG SQUEEZE

Another of the countless applications of the principle of the screw, said to have been invented by Archimedes about 250 B.C., the bench vise has been one of man's most useful tools. Nothing can take its place in holding an object which needs to be worked upon.

Like the bench vise, the newspaper Want Ad is another of man's inventions which has stood the test of time and which is irreplaceable when it comes to getting things done. A low cost means of communicating a message to a mass of people, the Want Ad stands unique as a feature of the weekly newspaper which no other medium can match.

AN OBSERVER WANT AD WILL WORK FOR YOU
