THE BEST WAY TO LOOK AT A SAAB IS FROM THE INSIDE OUT.
There's not too much you can put on a sticker these days that other cars don't have.
Disc brakes, rack-and-pinion steering, front-wheel drive. Even a turbo is not so unusual in a certain caliber car.
The difference comes in the way those things work together. The way it feels to accelerate, for instance. To take a sharp curve. To stop.
Obviously, the only way to discover this difference is to take a test drive. So a Saab salesman's pitch needs little more than one sentence: "Let's go for a ride."
SAAB
The most intelligent car ever built.
