MORE THAN 25 million Americans suffer from a disease called Osteoporosis which causes the weakening of bone tissue. Making bone fragile. Osteoporosis victims often suffer from small bone injuries, loss of height with a bent spine, or crippling hip fractures. The Bone & Mineral Division of Henry Ford Hospital is conducting a medical study on a investigational drug for Osteoporosis prevention and treatment. Anyone American woman who are between the ages of 45 to 80 years old, post menopausal for at least 3 years and currently not taking estrogen are eligible to participate. Participants will receive a free exam for Osteoporosis. It bone density is low and other requirements are met, you'll be asked to join the study. Well you'd have had a free exam and well hope your bone density and study the latest exams and treatment are free of charge. For more information on this study call Barry Gordon at Dr. Ortega form the Bone and Mineral Division at Henry Ford Hospital 876-7135
