NOWADAYS stores, restaurants, offices and homes may be as refreshingly cool in summer as they are comfortably warm in winter. New developments in summer cooling now permit the cooling of small spaces with a cabinet like the one shown above. This cabinet supplies refrigerated and dehumidified air—in quantities sufficient to make the atmosphere cool and comfortable regardless of outside conditions.

That summer comfort cooling is a profitable investment is proven by sales figures of many companies. One restaurant owner reported a 45% increase in business after installing comfort cooling.

Equipment is available in two styles: one in which ice is used for cooling, and the other in which the cooling is done mechanically. Detroit Edison engineers will gladly give you information regarding different types of cooling equipment available for your store, office or home, their method of operation, and some idea of cost. We do not sell nor rent this equipment, and there is no obligation on your part. Simply call the nearest Detroit Edison office.
