THE NEW SPEED LAW

Michigans' new speed law, which wipes out all speed laws by eliminating the maximum rate for any automobile, will go into effect in the near future. It will get a thorough tryout, and nowhere no more thorough, perhaps, than on the Grand River road.

Motorists on this highway have, in fact, been operating their cars for some time as if the new law were already in effect. Most of them appear never to have heard of any speed limit at all.

Congestion and a narrow highway hold down the speed far out from Detroit as Farmington. But west of Farmington, out to Novi and New Hudson and Brighton, Grand River is a speedway for all who care to take advantage of it. Residents of Novi, New Hudson, Brighton and along the road between these towns can testify eloquently to the conditions that already obtain on a pavement where there is no constant vigilance to curb speed.

A number of weeks ago a schoolboy, leaving the school bus, attempted to cross the road to go to his home and was killed by a speeding car. So terrifically fast was the machine going that it overturned, killing the driver. Speed made it impossible to avert the tragedy.

Speed is causing numerous accidents every week on the long, smooth stretches of Grand River avenue. Michigan's new speed law places the question of a safe rate of speed squarely up to the motorist. From observation of conditions on Grand River road our guess is that the motorists' judgment of what is a "reasonable and proper speed" will be whatever speed is necessary to get them where they want to go in the least possible time. Or whatever speed is necessary to demonstrate the superiority of one's own car over every other on the road.

VISIT THE HEALTH SERVICE
 Among the least spectacular, and yet one of the most important features of the Milford Fair this week is the health service conducted by the Oakland County Tuberculosis Association, an organization most deserving of the full support of the people of Oakland County. The health station should be visited by everyone who attends the fair.

It was a welcome announcement that the association was to again have a health centre at the fair. Last year's health service was so successful, in spreading the knowledge of the Association's work, that much is to be expected this year. The exhibit should serve to give the Association's work in the county greatly added prestige and support.

It serves to bring to mind the fact that the county tuberculosis association is throughout the year on the alert, guarding the health of the people by watching for the first sign of the dread disease it is organized to fight. Those in good health as well as those who already require care benefit from the Association's work. It is to be hoped that the circle of its influence and work will continue to widen.

Incidentally, mothers should not forget the baby clinics which will be conducted by the Oakland County Health Department at the fair. Though her child may not need care, every mother will be well repaid in satisfaction and peace of mind to know that her baby has been examined by competent attendants.

The government's plan to make money smaller will be in conformity with how it now looks by comparison.

"Are You Satisfied?"

M. Marie Walling

After you get a thing you want,
 Are you sure you're satisfied?
 Do you feel that it was justly earned?
 Are you glad you worked and tried?

Some think that they will never get
 The things they long for most.
 But favors are given to those who wait
 And not to those who boast.

It's a queer, queer life we're living
 And many times, we think
 Our troubles are bound to carry us down.
 Shall we keep afloat or sink?

Be satisfied with things you have
 Don't long for riches more
 They only bring unhappiness
 And troubles by the score.

After it all is finished,
 Try and be satisfied,
 Be glad when it is ended,
 That you have worked and tried.

A Touch of Elegance

SURELY it is with a feeling of great satisfaction that the housewife, at table, hands to waiting husband or child a cup of coffee drawn fresh and fragrant from the electric percolator before her; or a slice of toast lifted hot and crisp from the toaster at her elbow. And then the touch of elegance lent the table by a handsome electric appliance! The eye is not less pleased than the palate.

Economical, also! Not only are time and trouble and labor saved, but expense as well. For one cent's worth of current a percolator will make six cups of coffee, a toaster will make ten to twelve slices of toast, a waffle iron will make five waffles, a grill will cook cereal and bacon for two.

You can buy these appliances on convenient terms

Like Asking Her To Feed Behind a Hay-Rake

Expecting a dairy cow to get feed enough from submersed pasture is like expecting her to graze behind a hay-rake. She'll walk many a mile, but get mighty little nourishment. Summer grass, at best, is poor stuff—dry, tough, unpalatable. Don't pull down your cow's condition and sacrifice milk yield later on. Feed Larro daily now, there's profit in every pound.
