By EDNA FURDY WALSH
Making Gloves of Cold Cream
PREPARATORY to spring house cleaning a good protection for the hands should be considered. Many women do not like to wear rubber gloves for all kinds of work, and yet they are exceedingly fond of pretty, well kept hands.
In housecleaning, the dirt gets imbedded into the t-tissues, around the nails, and under them, defying subsequent washing. If cold cream is thoroughly rubbed and massaged into the fingers, under the nails, and on the entire hand before any cleaning work is done, and the excess of cream wiped off at the end of the day, all dirt will

come off like magic in warm water and soap, to which a little soda or a few drops of ammonia have been added.
The woman who drives her own car is often a fastidious woman who likes her hands immaculate at the end of a journey, even if she has had to change a tire on the road. If the simple precaution of massaging cold cream into the fingers before starting any dirty work has been made, the grease and dust will drop away like magic on a good washing, without the use of strong cleaning powders or pumice stone which is otherwise necessary when the hands have been plunged into grime and grease.

IN MEMORIAM

In memory of our dear husband and father, Donald Banfield, who left us January 10, 1928. His is not dead, he is just away. That Daddy of ours so dear; He shares our pleasures and sorrows,
To us he seems so near.
He guides our every footstep,
In this rocky road of life;
We know he is watching o'er us,
That we may conquer in the strife.
Sadly missed by his wife, Marion B. Banfield, and Donald and Gerald Banfield.

**Not Quantity Alone—
But QUALITY!**

Distinguishes the New FORD Car. Read this statement by the Ford Motor Company regarding the New Model A:

"The new Ford was a good car when it was first introduced. We made sure of that before we asked you to buy it. It is a better car today. . . . Constantly we are finding new and better ways of doing things. As soon as we are sure of them, we put them into the car. There is no such thing as a yearly model. Why should there be? As we make improvements, they are; so planned that owners of previously built cars may take immediate advantage of them."
