## CHEVROLET "PRESENTS" A NEW "SPECIAL SEDAN"

A further indication of the advantages which accrue to the motorist through the economies of great volume production is seen in the announcement by the Chevrolet Motor Company today of a stylish new closed model—the Chevrolet Special Sedan, with body by Fisher.

Introduction of the new model, with its many expensive car features, brings the Chevrolet passenger car line up to nine body styles—three open and six closed. The Special sedan has been in production for several days and shipments are now going out to dealers.

A leading feature of the new model is its equipment of six wire wheels, with large chrome-plated hub caps. The two spoke wheels are mounted in special fender wells. The exterior color scheme combines smart Boulevard maroon on the body with a harmonizing shade of red on the wheels.

Send in your news items.

When in the course of human events you hear that your balance is overdrawn, be nonchalant, but don't write any more checks.

The wife who wonders why hubby isn't exactly like he was before they were married probably has a husband who wonders why two don't live as cheap as one.

## Consider The Savings

Three meals a day. What do they cost? It depends upon who do not mean to be careless or extravagant, waste money in their selection of table supplies. They do not buy the most nutritious foods.

Fresh, pure Milk gives more for the money than anything else in the line of food that can be bought, because Fresh, Pure Milk is the most perfect and complete food. No waste to it. And the family that uses plenty of Pure, Fresh Milk is more apt to be healthy, especially the children, who cannot grow and be strong and robust without having the vitamins which Fresh, Pure Milk provide. Are we supplying you now?

FARMINGTON

# It's wise to choose a SIX!

After all, it is a perfectly simple matter to decide which automobile to buy in today's market. Only two questions must be answered to your satisfaction—

**First: Which car gives the most for my money?**

**Second: Which car represents the soundest investment in satisfaction and pride of ownership?**

Six-Cylinder Motor

In buying a low-priced car consider the following facts:

It is wise to choose a six-cylinder motor—for six cylinders are necessary to take out vibration and roughness. Six-cylinder smoothness will save the motor, the chassis, the body, the passengers and the driver. The Chevrolet is a six. And yet it sells at a price that anyone can afford to pay.

This very low-priced car lasts longer, not only because of fine materials and oversize parts, but also because it is a six. Its big, smooth, 50-horsepower six-cylinder engine is always "taking it easy." There is no feeling of strain.

With all its six-cylinder smoothness and power the New Chevrolet Six uses no extra gasoline or oil. Efficient design makes this possible—overhead valves—high compression power from an fuel—very latest carburetor—close-fitting, long-wearing pistons—crankcase ventilation—air cleaner. You can really have extreme economy and still satisfy your ideal of truly modern transportation.

Chevrolet economy is also the mark of Chevrolet sincerity in manufacture. To illustrate:

Chevrolet valves are readily accessible and adjustable. This saves replacing valves, and also makes it possible to preserve the efficiency of the engine.

Fully Enclosed Brakes

A similar example is found in molded brake lining—reducing the necessity of frequent replacement, and consequent expense.

Furthermore, there is a rear axle inspection plate on the Chevrolet.

The Coach	.....\$565
The Coupe	..... 565
The Sport Roadster	..... 535
The Sport Coupe	..... 655
The Club Sedan	..... 625
The Sedan	..... 675

This makes it unnecessary to take the axle apart to examine or clean it.

The new Chevrolet Six is full of such evidence that true motor car economy comes from modern advancement and refinement.

Like the finest cars, the Chevrolet Six provides the comfort and protection of four springs controlled by hydraulic shock absorbers. They are mounted lengthwise, in the direction of car travel, and self-adjusting spring shackles maintain quiet.

Delco-Loring Shock Absorbers

With low suspension and extra wheelbase, the Chevrolet Six has excellent proportions.

Its impressive front view is distinguished by the genuine honeycomb radiator, another mark of modern cars.

Safety Gasoline Tank

The gasoline tank is in the rear, for safety and finer appearance.

Chevrolet beauty instantly says "Body by Fisher"—costly car style, with the permanent quiet of Fisher composite steel-and-wood construction.

There is just as much extra value everywhere in the car. BY ANY STANDARD the Chevrolet Six is the greatest value in the low-price field.

It is wise to choose the Chevrolet Six with its six-cylinder valve-in-head motor... with full scientific equipment... with its Body by Fisher... with four long semi-elliptic springs, long wheelbase, low suspension, rear-mounted gas tank, honeycomb radiator and all the other features of this day and age.
