OPERATOR CALLS FIREMEN IN TIME TO SAVE BUILDING

A telephone operator in Chico, Cal., answering a line signal from a public telephone located in a restaurant one night recently, could not get no response. As it was past the closing hour, she reported the matter to the police department. Upon investigation it was found that a fire had started in the basement of the building. The fire had burned through the installation of the telephone wires, making a short circuit and causing the signal lamp to light in front of the operator. Because of prompt discovery of the fire the building was saved.

INJURED WOMAN SUMMONS AID BY TELEPHONE

[This accident occurred to a Michigan woman; name and address withheld]

"Mrs. _____, at home alone, climbed upon a stool to hang up clothing to dry. Losing her balance, she fell and broke a leg.

"With no one to give her aid, her first thought was of the telephone; which was in another room. Painfully, she dragged herself across the floor and, unable to reach the telephone, pulled it to the floor by the cord and summoned help before losing consciousness."

Just one call in an emergency may be worth more than the cost of telephone service for a lifetime.

A Tribute to the late Honorable Judge Ross Stockwell

Those who knew the late Honorable Ross Stockwell, Judge of Probate, will remember his life dream and ambition to develop plans for the betterment of underprivileged children, and to establish a Juvenile Home for them.

It is gratifying to know that this dream and plan which had its inception in his kindly heart has been realized. We now have a Juvenile Home of which we should be extremely proud.

Samuel J. Patterson, as administrator, executor and trustee in estates involving children, has gained invaluable experience. Oakland County knows Sam Patterson appreciates the duty of its citizens to this cause.

If yours were the
ONLY LIGHTED STORE
on the street

Suppose you had a monopoly on light, and your competitors were forced to sell their goods in gloom and semi-darkness. It is safe to predict that before very long you would have most of the business in town.

To a certain degree, this opportunity really exists. It is there—waiting for the smart merchandiser to take advantage of it. A survey reveals that over 70 per cent of retail stores of all classes are poorly lighted, and perhaps losing business in consequence. It is this condition which makes it possible for a merchant who installs brilliant lighting to gain a very real advantage over his competitors. Measured in dollars and cents, this advantage often amounts to as much as 10 per cent increase in sales. Good lighting is also a very great help to your customers.

Detroit Edison illuminating engineers will study your lighting without charge, and give you recommendations. Their suggestions involve no obligations.
