**Greater Mileage Doubtful**  
 Trucks and buses in 1932 accounted for more of the total registration than in 1928. Many cars now in use have been operated for more than five years, and the effect of such long periods of car-service is to increase greatly the amount of wear in line with reduced engine efficiency. There is no evidence to indicate that the private passenger cars in use last year were driven more miles, as many miles, as in 1928, for example. Yet deaths last year were appreciably greater than in 1928.

There are other factors in the experience of last year to indicate that the record was far from being what the opportunity offered. Of the non-fatal injuries, fractures, contusions and internal injuries accounted for a larger percentage of non-fatal injuries than in 1931. This fact and the percentage increase in deaths and injuries per accident serve to emphasize the continued carelessness and recklessness of too many persons when they drive cars or walk.

Ten deaths of 29,000 and 904,500 persons injured in 745,300 automobile accidents during a year when such casualties should at the least not have exceeded 1928, prove that automobile accidents in their human consequences in practically every city and hamlet of the country are a scourge of inventive America. These casualties present a challenge to every thinking person.

**Another Proof Against Speed**  
 Although only 14.8 per cent of the 745,300 automobile accidents in the United States last year occurred on highways, 31.8 per cent of the 29,000 deaths were caused by such accidents. The seriousness of these accidents indicates that too much speed is extremely hazardous.

Ten times as many persons are killed in automobile accidents in this country as in fire accidents.

**Annual School Report**  
**WALLED LAKE CONSOLIDATED SCHOOL**  
 District No. 1 Fractional, Township of Commerce

The Annual meeting of the Wallied Lake Consolidated School District No. 1, fr. Township of Commerce, County of Oakland, State of Michigan was held in the school building Monday evening, July 9, 1933.

**Ask State Farmers To Plant Less Wheat**

East Lansing—The step taken by the administrators of the Farm Relief Act in adjusting the acreage on basic crops to the normal demand from consumers will directly affect Michigan farmers who will be asked to reduce by 20 per cent the 765,800 acres of wheat grown annually in this state, and all consumers of wheat products will be indirectly affected, according to announcements made from Washington D. C., by Henry A. Wallace, secretary of agriculture.

Michigan is not usually considered to have vital interest in the wheat crop but the production here totals over 15 million bushels annually. The acreage planted to wheat in the state is equal to the total acreages planted to rye, barley, buckwheat, sugar beets and potatoes. As the Michigan wheat acreage is mostly confined to the southern portion of the lower peninsula, it is apparent that the proposed curtailment of wheat acreage will materially affect Michigan farm practices.

**LICENSE PLATES**

Lansing—The alphabetical system of distributing automobile license plates to the various counties will be continued in 1934, it was announced by Secretary of State Frank D. Fitzgerald. The same letters will be assigned in 1934 as in 1933.

Michigan is the only state in which the State Department of Public Instruction inspects the business colleges. H. S. Norcross, head of the commercial department of Kalamazoo schools is the official accrediting representative working in connection with the state department.
