

**Towermans Short Wave Radio Gets California**

Although consistently dependable over short-distances only, the ultra short-wave radio set installed recently in the Hebron tower surprised Michigan's conservation authorities by reaching California.

Frank Warner, the towerman in the Hebron lookout, was listening in on a radio conversation between two towermen, supposedly some-

where in northern Michigan. When the message was completed and the speakers signed off, he discovered they were federal forest rangers in the Santa Barbara region of California. He had made no attempt to break into the conversation.

The set at the Hebron tower and in the Bliss tower of Emmet county were designed by radio engineers of the Department of Conservation for inter-tower forest fire communication.

**BLAME WORLD ILLS UPON OVEREATING**

**Medical Author Says Too Many Meals Clog System.**

Vienna.—War, racial and national hatreds, economic crises and unemployment are all due to overeating, a solution of these problems rests with our stomach.

This is the theory of the Austrian physician, Dr. Franz Xaver Mayr, whose recent book, "The Rationalization of the Human Machine, A Radical Solution of the Unemployment Problem," evoked severe criticism and benevolent smiles.

Dr. Mayr contends that we are all overfed and wrongly fed, from infancy on.

Owing to irrational eating since we were born we accumulate considerable reservoirs of poison in our system, the physician declares, continuing:

"Too much eating. Overeating. Too many meals. Not enough rest for the digestive system. Our digestive apparatus is weary and distorted. Our nerves are poisoned. The glands of internal secretion are abnormal. All that influences our brains and affects our thoughts. This poisoning is the real source of the crisis within our organism and the crisis of the social system. It leads to evil passion, anger, hate, mania, destruction and war."

"Stop stuffing the human body with poison. Cleanse the system thoroughly with a hunger cure. Remove the fat. That will restore the equilibrium of the human body and will rejuvenate it."

**Health Officer Suggests Everyone Take Vacation**

Orbana, Ill.—"Tomorrow's health depends upon today's prevention," says Dr. J. Howard Beard, University of Illinois health officer, as he suggests every one take a vacation this summer.

"You cannot afford to miss a vacation," he contended.

"Perhaps you think you cannot afford a vacation because you are too busy, could spend the time profitably in some other way, or perhaps you wish to retrench," he said. "Your body and mind need a change from routine work."

He warned, however, that many vacations are often short cut: to hills for medical service.

Stay away from flies and mosquitoes, he said.

Use milk that is safe—that which comes from tuberculin-tested cows, which has been handled by attendants who have been careful about cleanliness. Use pasteurized milk.

Germany Bans Dictating by Brewers to Taverns  
Berlin.—German brewers in the future must rely on their beer. Since the war many of them have dabbled in mineral waters—and even in wine.

Thus innkeepers who were tied to a brewery often were compelled to accept their wine and waters from the same source. Now, innkeepers have been freed by law from this obligation—breweries can no longer deprive them of their independence.

The innkeepers are at liberty to buy their varied drinks from varied sources—which, it is claimed, is all to the good of their thirsty customers. Of course, the brewers may come to sell soft drinks and wines if they wish; but such sales will depend upon quality and not upon compulsion.

**School Institutes a Plan for Complete Medical Aid**

Middletown, Conn.—An innovation in the treatment of students in the past many students who needed medical care neglected to obtain it, due to the necessity to economize.

**Wrong Bell Stops Fight With "Kayo"**

New York.—Kayoed by the goop they used to and still bear the expression "kayed by the bell," but Billy Merritt, a negro heavyweight, was the victim of one—and a coward, at that.

Merritt, fighting in a local amateur tournament, was far ahead on points in his bout with Abner Wright when some "joker" started calling the crowd home.

Merritt, thinking it was the bell, dropped his guard and Wright landed kerplunk on the negro's chin and the fight was over.

**WEST FARMINGTON**

The Walled Lake Women's Temperance Union met at the home of Mrs. Cameron Tuesday afternoon. Mrs. Ervin and Mrs. Todd of Detroit were guest speakers. At the conclusion of the meeting tea was served to about 25 who were present.

Miss Grace German, who has been teaching at Union Lake, has returned home as her school closed Friday for summer vacation.

Mrs. Georgia Bell of Grand Rapids visited relatives here Saturday.

Mr. and Mrs. J. C. Cox motored to Howell Saturday to call on Mr. and Mrs. Harry Youngs.

Mrs. Henry Russel is home from the hospital with her baby girl. Both are doing nicely.

Mrs. Henry Colestock entertained her Sunday school class of boys at a party Thursday afternoon.

The West Farmington school will close Thursday with a picnic at Cass Benton park.

Walter Sherman of Detroit, formerly of West Farmington, was buried at North Farmington Cemetery Friday afternoon. Mr. Sherman married Miss Myrtle Crawford, who survives him. He had been in poor health for about a year. The Sherman's moved away from West Farmington about 20 years ago.

Mrs. Fred German and daughter Grace are planning a motor

trip to Oregon where they will visit relatives. Mrs. German is a former resident of Oregon.

Send in news items EARLY.

**Are You Interested In ECONOMY?**

Economy, we find, is one of the most important and first sought features by prospective automobile owners when making a choice of a new car.

For this reason, we take great pride in telling all you who are thinking of buying a new car that there is no automobile manufactured that can be purchased, operated or maintained more economically than the new 1936 Ford V-8.

The initial purchase price of a Ford V-8 is low and may be extended over as many as 26 months with payments of only \$25 per month.

Oil and gas consumption is exceptionally low.

Experiments worked over a period of time have proven that the maintenance cost of a Ford V-8 is a fraction of the cost of "keeping-up" other low-price cars.

You're missing the treat of your life if you haven't ridden in or driven one of the 1936 Ford V-8's. Come in and let us demonstrate one today.
