23608 Warner Avenue
Rev. Orville J. Windel, Pastor
Sunday School, 9:45 a. m.
Morning Worship, 11:00 a. m.
Teaching, preaching and singing the gospel of Christ.
Everybody welcome.

FIRST METHODIST
Rev. Howard C. Buehling, Pastor
Morning Worship at 10:30. The subject of the sermon by the pastor will be "Long-Suffering."
Church School, 12 noon.

CHURCH OF CHRIST
33200 Seven Mile Road
Sunday School, 10:00 a. m.
Preaching, 11 a. m.
Sunday Evening, 7:45 p. m.

CHRISTIAN SCIENCE SOCIETY
New Farmington, Michigan
"Truth" will be the subject of the Lesson-Sermon in all Christian Science Churches throughout the world on Sunday, July 27.
The Golden Text (Psalms 117: 1, 2): "O praise the Lord, and all ye nations." For his merciful kindness is great toward us; and the truth of the Lord endureth forever.
Among the Bible citations in this passage (Psalm 33: 4, 5): "For the word of the Lord is right; and all his works are done in truth. He loveth righteousness and judgment: the earth is full of the goodness of the Lord."
Correlative passages to be read from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, include the following (p. 465): "Truth is immortal; error is mortal. Truth is limitless; error is limited. Truth is intelligent; error is non-intelligent. Moreover, Truth is real, and error is unreal."

THIS WEEK IN DEFENSE

Sidney Hillman, OPM Associate Director General, last week established a labor supply branch within the OPM Labor Division to assure a steady flow of skilled workers into expanding defense industries.

Labor Supply Committee Provided
The work of 12 governmental units dealing with defense labor was placed under the direction of Civil Service Commissioner Arthur S. Fleming. A dozen regional labor supply committees will operate, Hillman said, to enlist the aid of labor and management groups in industrial areas.

"We are confident that we have here established a sound apparatus for meeting existing manpower requirements and anticipating them progressively as defense industry expands," Hillman said.

He explained that President Roosevelt on May 25 had asked the OPM Labor Division to "assume full responsibility" for providing defense industries with workmen.

Defense Labor Advisory Committee to correspond with the Defense Industry Advisory Committee set up on May 21 also were established by OPM. Members will serve in an advisory role on labor aspects of defense production.

Aircraft Production Mounts
Evidence that defense production is mounting came meanwhile in the OPM announcement that 117 military aircraft were delivered in June as against 1,334 in May. This was the largest output to date by almost 100.

Director General William S. Knudsen meanwhile was making a Nationwide tour to observe the growing aircraft production for Army and Navy trainer planes. Thus U. S. armed forces will gain doubly from the drive.

Out of the 15,000,000 pounds of usable aluminum scrap expected to be collected, Robert E. McConnell, chief of the OPM Conservation Unit, estimated that 2,000 fighting planes or 500 bombers can be built.

Mayor LaGuardia, informed governors that convenient concentration points will be designated in each State for the accumulation of the aluminum before being sold to smelters.

With other conservation drives being organized, the OPM revealed a recommendation of the National Academy of Sciences that silver be substituted for tin in solder. This saving, plus the reduction in tin now being made by can manufacturers, would cut tin consumption 25 percent, the report said, and thus add to the U. S. reserve.

Chromium Under Priority Control
The OPM Priorities Division placed chromium under full priority control, releasing a new plan for regulating distribution of machine tools, and amended the copper preference order to cover copper-base alloys.

Sixty-First Session Michigan Legislature

(This is the fifth of a series of articles based upon legislation passed in this session of the Michigan Legislature which is of vital concern to all citizens of this state.)

A great deal of activity accompanied the opening of the Sixty-First Session of the Michigan Legislature on Tuesday, July 5. Usually a dull and rather uninteresting affair, this session opened with a great deal of stimulus and enthusiasm. The reasons for this pleasant change can be tied to the present national emergency and the closer bonds of partisan politics.

Only a quick glance at the official calendar of the Senate and House of Representatives will prove that much has been planned for this session. A good comparison can be drawn from the account given here of the quantity of bills introduced in the first few days of activity over the work carried on during the whole of the long session, which has been summarized in this paper during the past few weeks.

In this article a brief summary will be presented showing some of the more important bills under consideration in both the House of Representatives and the Senate.

Several motions and resolutions were presented in the Senate as the action of the session got under way.

A resolution requesting the Conservation Commission to maintain the operation of all state parks on their present basis without the charging of any fees for their use, was introduced by Senator Buehwin. It carried the number of Senate Concurrent Resolution No. 61 and was defeated 12 to 16.

Another Senate resolution presented jointly by Senators Duggs and Howell passed. It involved the urging by the Senate of all Michigan manufacturers having national defense contracts to employ Michigan labor, and to grant all Michigan residents an equal opportunity by not discriminating on account of race or creed.

House Resolution No. 54, introduced by Representatives Stenson and Spjels, concerned the appointment of a committee to promote the preservation of natural resources in the state of Michigan. This resolution was adopted by the House.

Senate Resolution No. 58 calls for the appointment of a committee of three Senators to make a study of the possibilities of consolidating and reducing the number of standing committees of the Senate. This resolution was adopted.

Although these many resolutions seem meaningless and unimportant they constitute the background for a working legislature. Besides these motions there was much activity concerning the procedure to follow during this short session which is of vital importance. With the reconvening of the legislature there are many messages exchanged between the Governor and both houses of the legislature. These are extremely important as they contain the legislation from the previous session which was either approved or vetoed by the Governor. All these messages have to be reviewed before the legislature and a decision as to further action is made. This is all action which will come to the fore as this session gets deeper into the action before it.

Looking Back Through The Enterprise Files

FIVE YEARS AGO (July 23, 1926)
One of the longest fire-fighting battles in the Farmington area began four o'clock Sunday morning in the barn on the C. E. Sorenson farm, 35700 Grand River, and was not ended until noon, eight hours later. The fire was caused by spontaneous combustion, due to greenness of newly-stored hay and the high temperature of the recent hot spell. Over 120 tons of hay were stored in the barn.

Elimination of most of the hazard and inconvenience at two dangerous spots along Grand River is expected shortly following a visit to Farmington of State Highway Commissioner Murray D. VanWagoner. The situations to be accorded modern safety treatment are the intersection of Grand River with the east end of the cut-off, and the Grand River-Middlebelt crossing.

"The lighter traffic, the deadlier accident," is the policeman's motto, which was tragically borne out during the past week when four persons were killed and nine were seriously injured, possibly fatally, in the area patrolled by Deputy Sheriff Joseph DeVriendt.

John N. Daley, receiver of the Peoples State Bank of Farmington for the past three years, will assume one of the most important posts in the Detroit city government Friday, when he takes office as City Controller, to which place he was appointed Thursday noon by Mayor Frank Couzens.

Work will begin soon on a connecting water main on Nine Mile Road between Power and Brookdale avenues, according to Commissioner Emory Hinton. This will eliminate two dead-ends, one on each street which have been a source of some difficulty in the past.

In order to attract the attention of both townsmen and out-of-town people to the new Farmington municipal parking lot on Grand River, a large street light has been installed in the southeast corner of the grounds. In addition to having the lot lighted, signs are soon to be added to the equipment, inviting car owners to leave their autos in the free parking lot.

TEN YEARS AGO (July 23, 1921)
One of the old landmarks of Farmington has been destroyed within the last few days. The dwelling house on Farmington Road, the property of the old D.L.R. system has been torn down. It was built about 1871 by William Hendry's son and that he bought of Abraham Lapham, owner at the time of what is now known as the Warner farm.

The first of a series of Saturday night band concerts will be given by the Farmington High School band at 7:45 o'clock, Saturday, in the town park. Mr. E. C. Eaton, director of the band, has been holding rehearsals for the band three nights a week at the school, and will have about thirty musicians ready to play.

The seventh annual reunion of the Angling Road school was held with Karl N. Tibbitts as guest Saturday, July 18, at Rosemond Hills woods. About 60 teachers, pupils and friends were present for the occasion.

Rev. Frank D. Adams, pastor of the Universalist churches of Farmington and Detroit, has taken up his duties as chairman of the Detroit Mayor's Unemployment Committee, having been named to head the committee a few days ago by Mayor Frank Murphy.

Signal lighting equipment ordered by the State Highway Department for the crossing at Northwestern Highway and Telegraph Road was installed Tuesday the department reports. Traffic lights at the intersection of Lusher, Ten Mile, Twelve Mile, Thirteen Mile Road with Northwestern Highway have also been installed.

Recommendation that an improved system of books be installed by the City of Farmington was made to the City Commission Monday evening by a new firm of auditors who presented a detailed report of city finances. City officials have been dissatisfied for some time with the system of bookkeeping, particular complaint having been that reports were not easily understandable.

Advancing Civilization

In official communications from Germany and Russia last week, a startling fact was presented. The combined forces of the two armies totaled 5,000,000 men.

This constitutes an army greater than the combined populations of New York City and Detroit. Civilization is charging onward carrying men, women and children saturated with hate as it rages into fields of destruction. How far has civilization advanced, when men with no individual grievance against one another desire to kill, or are at least whipped into a rage by men far from the fields of battle.

Think of the contribution that could be given to the world if men could leave this hate behind them. With the millions of dollars spent every day by these warring nations, a world of united and underprivileged men, women and children could be turned into happy, productive elements. What will the outcome be if nations and peoples continue to think and act in terms of hate and revenge? Free out of an unstable and disorganized period come repercussions leaving peoples broken and bewildered. It is in these periods that adverse forces of government take over and enslave the people.

The United States still has an opportunity to preserve itself, by keeping out of war. It is only through this method that we will be able to keep our individuality and institutions free. None should we stop our efforts toward national defense. Only by continually driving ourselves along lines of protection will we be able to save ourselves from attempts to attack us. Emotions and feelings run high in periods such as this and propaganda agencies shout prog and cons into our ears, but there is only one straight line to a united America and only one straight answer to the dictators of Europe—The United States is prepared to defend itself and the democracies of the world to the fullest extent of its resources and laborers, but it is united here, and not on the ruins of Europe.

Pots and Pans

This week Farmington along with all America is in a drive to collect aluminum which is of vital importance to our national defense. By a little effort on your part you may do much toward aiding this country in preparing itself during this emergency. Many of you no doubt have old pots and pans tucked away in a corner which would be of considerable help. This will give you just the opportunity you have been looking for to clean up those corners and at the same time be of service to your country. Any old articles that are made of aluminum will be welcomed. Regardless of the size of the article, it will help. If everyone in this nation contributed but one small article it would solve this acute problem.

If you are unable to get your old aluminum to the cage erected on the lawn before the Groves Walker Post of the American Legion, Roy Seung will visit your home Friday, to pick up your contribution. If this is impossible the American Legion Post will be open all day Saturday for your convenience.

This is America's job and let's show them that Farmington can do its part.

Other Editors Say

The Squash Unbends

(Christian Science Monitor)
Certain American housewives shopping for that old favorite, the summer squash, have failed to recognize it this season, we are told. The reason is that the squash has undergone a bit of redesigning.

Instead of displaying the gracefully curving neck which used to embellish the vegetable, the new squash, the 1941 model is straight, rather resembling an Indian club. One description is that it looks like a "stretched-out egg," but to anyone who has ever tried to stretch an egg that may be a bit disconcerting.

As with so many projects today, the alteration turns out to have been a Government job. One should not jump to the conclusion that it is the Federal Bureau of Investigation which has taken the crook out of the neck of the squash. The fact is it has been done by the Department of Agriculture through years of patient breeding in order that growers may have a product easier to arrange in crates. There you have it with all the political implications. The squash sticks its neck out and gets reamed in a shipping bin.

The superintendent of parks are warned not to let the Department of Agriculture get hold of any of their lawns.

Name-Calling Aside

(Christian Science Monitor)
The great decisions the American people have to make should not be confused by personalities. The likes of Lindbergh private war is too much like propaganda publicity. Most thoughtful citizens realize that it has nothing to do with the merits of the issues involved.

They know that the Secretary of Interior's name-calling attacks upon the files for keeping a National medal do not prove that it would be better for the United States to

The Farmer Has a Heart

(The Christian Science Monitor)
Many farmers have gladly adopted an inexpensive, practical device on their mowing machines that saves uncounted birds and their nests. A bar is so attached that it flushes the birds which have made their nest on the ground. The operator sees the bird fly up; he raises the bar a few feet. This gives the nest unharmed and protected by a small area of grass. If you see these "islands of hay" in fields and meadows, it is proof of the growing movement for conservation of wild-life resources, and the appreciation of the farmer for his friends.

AVOID A "CRASH LANDING" AWAY FROM HOME

Carry Travelers' Cheques

It would be a serious jolt to have your money stolen or lost on a vacation or business trip. You might find yourself in an embarrassing fix.

The best insurance against such travel disasters is to carry Travelers' Cheques. They provide "personal currency" which you can issue as you need it. Easily cashable. Available in convenient denominations. Reimbursement in case of loss. Buy Travelers' Cheques at this bank before you travel anywhere.
