Bring Your Own Picnic

DON'T take a defeatist attitude on the subject of picnics just because you can't throw everything in the car and be off as in the good old days. Carry your lunch or supper to some nearby picnic spot and you will have a good time in spite of rationing and shortages. Include a thermos or two of iced coffee in the picnic basket for everyone who will be tired and thirsty by the time you reach your destination. And don't forget some sodas either. . . they always go over in a big way. As long as you can find the makings of a sandwich with meat, cheese and rationed foods and then make for a nearby picnic spot. There along some refreshing iced coffee in a thermos and plenty of these Latin-American cookies. They are coffee-flavored and filled with bits of chocolate. . . a delectable combination that melts in your mouth. They keep well, too, so are the perfect sweet for picnic baskets and lunch boxes. Here is the recipe for Latin-American cookies. It's tested, of course.

**CHURCHES JOIN
TO OBSERVE
SPECIAL WEEK**

Protestant churches and other religious agencies of rural and urban areas of the United States and Canada will unite in the observance of the 15th annual Religious Education Week, September 20 to October 7, giving emphasis to the building of Christian character. It was announced by Dr. Roy A. Ross, general secretary of the International Council of Religious Education, sponsor of the program. Using the theme, "Character for a Free World," 40 Protestant denominations and 183 state, provincial and city councils of churches and religious education will cooperate for the community-wide observance. "America today enjoys an enviable position among the world of nations," Dr. Ross declared. "Her place in the life of the world has stemmed from the fact that her institutions, social patterns, and policies have been founded on spiritual foundations. Her ability to maintain world leadership will depend upon the quality of her internal life and the extent to

which she is true to her Christian heritage. "Through their local schools and their inter-church community organizations for Christian education, the people of each town or city have an opportunity during Religious Education Week to make that heritage live anew in the lives of their children, thus bringing life's greatest blessing to them both as individuals and as citizens of tomorrow's world," he avers. In most towns and cities, Rally Day or promotion Day on the opening Sunday will emphasize educational evangelism as Church schools renew efforts to increase enrollment and attendance. Community interest will be developed through week-day programs including launching of leadership education schools on Monday, family nights on Tuesday, inter-church fellowship meetings on Thursday, and denominational or inter-denominational youth rallies on Friday. The week's observance will climax on World Communion Sunday with emphasis on "the unifying power of World Christian Fellowship to build a free world."

At the Neighborhood Bible

School Sunday morning a Navy bell was on display. It is to be hung and used as a means of summing worshippers to the little church. The plan is to have it rung half an hour before each service and at the time of opening. Rev. Gordon Cameron was in charge of the prayer and thanksgiving service at the Neighborhood Church Sunday evening. Rev. Axel Edwards will be the speaker at 6:30 p.m. next Sunday evening.

Supplements Sugar Honey may be used cup for cup instead of sugar in canning or cooking, up to one-half of the sweetening called for. If it is measured in a graded or moist cup, it will pour easily. If honey granulates, put the container in a bowl of warm water until the crystals are melted. When baking a dough or batter containing honey, it is best to use a low temperature, between 300 and 325 degrees.

Pump Shelter For a cheap, waterproof housing for a pump motor, cut one end out of a 50-gallon gas barrel and cut a slot in the side for working parts of the jack.

Better Hay Economists of the department of agriculture figure our wartime hay supply has given farm livestock 18 pounds more digestible protein per ton of hay than the bays of 20 years ago.
