Studies Show Time Saving In Home Management

Time and motion studies by home management investigators in several homes have shown that using the hands as a team makes many household jobs easier and speedier.

Investigators in war industries have made similar conclusions. To change the working habits of men and women, practice, studies show, but pay in time and energy saved.

One job investigated was washing spinach. Many a housewife has complained of the time it takes "to get the grit out of those curly leaves."

Observation showed that the average housewife uses one pan in a single sink, and, with one hand, lifts the greens from the water to a colander, and back into the freshening water.

Five of the women observed washed spinach leaf by leaf, which took 50 per cent extra time. Tests showed that the job could be done as well in less than half the time by using two pans or a double sink, filling them alternately with water, and using both hands to draw and drain off water and to lift the greens.

Most women cut off the roots in the washing water or sink, but trimming directly into a garbage container before washing proved faster. The tests also showed that washing in lukewarm water takes less time than washing in cold water.

Now Possible to Paint By Electrical Method By Electrical Method The same principles that drive tiny particles of electricity from negative to positive in radio tubes have just been put to work doing a high-speed, top-quality job of painting machinery and other complicated objects.

Improved methods of production in the industry will be a major factor for years to come in supplying resources to the Nation for Victory Bond holders to share.

Clean Sewing Machine Keep the sewing machine in top running condition at all times. If the machine has not had a thorough cleaning for some time, gummed oil and dirt may have accumulated.

Determine Safety An important safety rule, the foresters call their prize-winning, concerns tree-felling itself. Before you fell any sizable tree, decide exactly where you are going to run it.

Doctor's Efforts Are Often Handicapped Sometimes the doctor's efforts are seriously handicapped by voluntary advice of those who can cite instances where such and such a specific work has done for their friends.

Medication is always important. It must be prescribed by a physician, it must be compounded by a competent druggist.

Plan Family Needs Plan and prepare for your family's needs. And do what "beforehand" food preparation you can - for example - make cookies that keep - sandwich spreads and quick mixes for breads - cream sauce and the like.
