## The Lafayette Criterion 2001 10" 3-Way Speaker System

This 2001 is from tomorrow land! (1) It features a rugged ten-inch woofer. (2) Two inch by six inch mid-range horn. (3) A wide dispersion tweeter. (4) Rectangular bass port opening. (5) Custom sound controls are front-mounted for tuning your system. (6) It handles up to 70 watts RMS with Frequency from 30-18,000 Hz. (7) It's fuse protected. (8) Sturdy removable grille in handsome sculptured brown polyester knit (9) Cabinet finished in walnut vinyl. (10) Nominal impedance 8 ohms.

## The Lafayette Criterion 2002 12" 3-Way 4 Speaker System

Magnificent music reproduction is achieved with features like (1) a heavy, heavy-duty 12" woofer whose low frequency output is reinforced by three internal tuned ducts. (2) Rectangular port opening produces bass that you feel as well as hear. (3) High performance mid-range exponential horn provides outstanding presence. (4) Two angularly mounted phenolic ring tweeters for wide dispersion. (5) Front mounted high frequency and compensation/equalization controls. (6) Time-sensitive protective fuse guards against overload. (7) System response: 20-20,000 Hz. (8) Power handling: 90 watts RMS. Nominal impedance 8 ohms. (9) Sturdy removable grille in handsome sculptured brown polyester knit. (10) Cabinet finished in walnut vinyl.

## The Lafayette Criterion 2005 Hell Air-Motion Transformer Speaker System

• Hell® Air-Motion Transformer Tweeter

**\$199<sup>95</sup>**  
each

The 2005 was created especially for the Criterion system. (1) the revolutionary design uses a "Corona Field" air-motion transformer to get astonishing clarity and definition, and virtually instantaneous transient response. (2) The 2005 is a high-efficiency system that produces outstanding definition to the highest frequencies providing essentially flat response to 22,000 Hz. and beyond. (3) The superb quality of the system and the dynamic engineering give complete freedom from fatigue-producing distortion. (4) The unique sound column design contains a Hell air-motion mid-range tweeter. (5) A 10" woofer for deep bass and increased mid-range sound. (6) The column also has a continuously variable control to adjust high frequencies to balance with room acoustics. (7) This sound system is light years ahead in design and performance. It is truly a revolutionary advance in speakers that must be heard to be appreciated. (8) Check these specs: frequency response: 30-24,000 Hz.; Minimum power requirement: 15 watts RMS, 300 watts peak program, circuit breaker protected; Nominal impedance 8 ohms. Each column is 40 x 13 1/2 x 12 1/2".
