IJ-your TV set consistently shows signs of 'gibeting' or 'snow' a primary suspect must be the antenne, or perhaps the entire antenne system. Just because you've get the antenne system. Just because you've get the the antenne is giving you the kind of reception your set is capable of. Even if it was effection when it was installed, time takes fix toil, a severe one in the case of outdoor antennes. You should follow a program of antenness. You should follow a program of just like heving your furnace cleaned every fail.
