

### Tile Blends Well With Mixed Furniture

Manufacturers of resilient asbestos tile designed to blend floor coverings now offer vinyl with a mixed collection of coordinating themes. According to The Better Floors Council, the new off-white and beige tones are designed for use with contemporary or traditional furnishings, or a mixture of both.

#### RECIPE

## RUM COLLINS

The first collins was concocted with rum, during the American Revolution. Still unbeatable.

1 oz. lemon juice and 1 tsp. sugar (or use a prepared collins mix). Add 2 oz. white or silver Puerto Rican rum; shake with ice, strain into a tall glass full of ice cubes, and top with club soda.

**PUERTO RICAN RUM** is light and dry and outsells all others 3 to 1

### SKELETONIZING LEAVES:

If you want to try something different, why not skeletonize leaves of trees such as magnolia, beech, etc? Gather them, soak and boil in a soda solution for 30 minutes, using a teaspoon of baking soda to a quart of water. Let the leaves cool in the solution and then spread them out on a piece of newspaper. Scrape off the fleshy part of the leaf on both sides.

Then mix two tablespoons of bleaching solution and allow the leaves to stay in the bleach for one hour. This makes them white. Place between sheets of absorbent paper to dry. To tint, spray with aerosol spray paints and if you wish, dip in cake coloring, school tints or a tinting material.

Incidentally, did you know you can preserve the colors of most of your favorite garden flowers by treating them with ordinary white all-purpose flour?

Gladious blooms, roses, lilies, callas and others can be preserved by covering the blossoms with the flour two to four weeks, depending upon the size of the blossoms. After that period the blossoms are carefully removed and the flour is dusted off them.

### Leaf curl has been common this year, worse on pruned and staked tomatoes. It's worse on hot days and following heavy rains. It's not serious, unless plants are infected with mosaic.

### Clay Pots Improve Plant Appearance

As you admire spring blooms, you'll note that most prize-winning plants in both professional and expert amateur grower classes are in red clay pots.

Both growers and house plant collectors find that plants grow better, look better and stay healthier with less care in porous clay pots, which keep off harmful excess moisture and salts.
