

That's Finding Of Esch, McDonald In Campus Visits

WASHINGTON
It's not just the Students for a Democratic Society and Black Panthers who are responsible for campus unrest.

Where there have been campus disruptions, a majority or near-majority of students are sympathetic to the cause according to two Oberlander congressmen who were part of a 22-man study.

Reps. Marvin Esch of the 2nd Dist. and Jack McDonald of the 10th were among the signers of a report to President Nixon on campus problems. Average

age of the 22, all Republicans, was 37.

MANY STUDENTS are indeed about getting reforms on campus and in society, and are thoroughly disenchanted with the "System," which they equate with racism, war and poverty, the congressmen said.

Esch, 42, of Ann Arbor, and McDonald, 36, of Livonia, went a step beyond the majority to say this disenchanted affects a near-majority of the students on the trouble spots they visited.

WHAT MADE today's students disenchanted from the student radicals of yesterday?

Said McDonald, "I saw one year at Wayne State University. 'I grew up during the depression. I was motivated to prepare myself for making a living for myself and my future family. These students come from families with jobs."

Esch, 42, of Ann Arbor, and McDonald, 36, of Livonia, went a step beyond the majority to say this disenchanted affects a near-majority of the students on the trouble spots they visited.

put as high a regard in the area of making a living."

"Industry is finding that out when they try to hire graduating students these days," McDonald said.

McDonald met with faculty and student groups—some of whom sympathetic to George Washington's dissident students' cause. He also met with black students and observed:

"They're not all radicals. Some just wanted to get a few constructive things done—like black scholarships through fed-

eral programs. And they got things done."

ESCH, WHO HAS taught at Wayne State and the University of Michigan before entering politics, saw a need for college administrations to open better lines of communication with students.

Esch also urged administrators to better protect procedures on student discipline: "Most procedures are extremely informal. Students don't know how they might pro-

tect or criticize legitimately."

The political tenor of the group ranged from the liberal Donald Riegle, 31-year-old Finland congressman, to the moderate conservatism of William Brock of Tennessee.

But on this they agreed: Congress should not try to punish entire campuses by cutting off aid if there is a disruption. To this they argued, would be to play into the hands of campus radicals.

WHILE THE congressmen

listened with sympathy to student complaints, they found some reason to criticize students' attitudes.

Students failed to understand the problems of trustees and tended to be "intolerant" of other age groups because of their own position of isolation from society and social responsibilities, the congressmen wrote.

"Some students appear to be more caught up in contemporary problems rather than in the difficult process of learning...in

these students we found an impatience with and a lack of appreciation of method and process, whether it be the intellectual method of abstraction and generalization or the process of practicing democracy."

Among the group's proposed solutions were lowering the voting age to 18, reforming the draft, encouraging student participation in politics, and increasing federal support of work-study, loan and other educational aid programs.

THERE WERE FIVE waiting to greet Capt. Gerard Braun, 10020 Garden, Livonia, home after his tour of duty with the Air Force reservists. Captain Braun and his wife are shown with their four children (from left) Christopher, Monica, Carlton and Martin. (Evert photo)

State Police Use Air, Ground Holiday Patrols

Bolstered by special car and plane speed detectors, the Michigan State Police will operate intensified holiday patrols beginning at noon Thursday, July 3. Col. Fredrick E. Davids, department director, reported.

About 100 patrol cars will be employing the department's new electronic speed computer-called VESCAR (visual average speed computer and recorder).

Officers have been in training the past several weeks so that the computer could be in use in all State Police districts about July 1. It is already in use in some areas.

THE AERIAL DETECTORS will be the department pilots and their offi-

cials by stopwatch over specially marked one-eighth mile sections of highway in various parts of the state.

Information on speeders will be radioed to patrol cars for followup action. This aerial speed patrol, used as manpower and weather permit, was put into effect several years ago.

Patrol troopers, augmented by motor vehicle check lane officers and other officers as needed, will provide heavy coverage from noon July 3 to midnight Sunday, July 6. Maximum attention will be devoted to traffic from 3 to at least 9 p.m. daily during the holiday period.

July 4 holiday period accidents killed 26 persons in Michigan last year. The average toll for this holiday time was 31 in the years 1964-68. High loss for this period was 43 in 1964.
