Architect sees change in lifestyles

comes as Lenten treat

By CORINNE ABATT

Like music, dress and literature, houses send out signals about a people and their culture.

Bloomfield Hills architect Louis DesRosiers (pronounced De-Roseyach), a graduate of Lawrence Tech, said. "The style of living now is more open than ever before. People are more open minded, people are more open minded, people are more odgoing and they are receptive to odgoing and they are receptive to make the style of living now in the analysis of the many of the style of

SOME OF THE INDICATORS of changing litestyles are the gradual demise of the family room, fewer walts, the move from dining rooms to dring areas, the demand for sunny areas for plants, and a return to the big, open, farm-style kitchen. The gathering room, which is a living/family room room, has taken place of the former family room. Gathering room is DesRosiers name for what is frequently the largest one in his houses. It often can be seen from the foyer, the dining areas and the hallways.

seen from the foyer, the dining areas and the hallways.

This architect likes to plan his homes on the sun-plant room is also the breakfast area—which will have a flood, of morning sun. The kitchen is adjacent to the sunny, plant-filled eating area. It actually is an extension of the kitchen, marked by counter islands.

This way the kitchen becomes an enjoyable place to work and spend time—a center for family activity.

FEWER PERMANENT WALLS in the interior of the house allow more flow, visual and actual movement, from one area to another.

Many clients often insist on, and the architect is willing to provide, a study. The reason for a study stems from contemporary life.

"There is a lot of book work and a lot of paper work connected with running a home. While we are putting desks in the kitchen, this really is just for making lists, not for bome record keeping tasks.

"I like to put the study off the foyer and convenient to the master bedroom."

and convenient to the master bed-room." The reasoning here is that a trade, service person or business acquaint-ance can be taken from the door to the study without havin! to go through the home.

in checking lifestyles, DesRosiers has found that many people like to work in the study just before retiring or will get up in the middle of the night and work in the study. It's proximity to the bedroom is an extra conven-

wHILE GETTING AWAY from walls, DesRosiers said it is vital to retain "the cozy, comfortable feeling that everybody loves."
This is accomplished by proper scale of spaces, types of materials used and curved walls. "Everyone relates to a curved, linear surface."
In his study of people and their pierences, DesRosiers thinks this has something to do with the basic human form and the fact that it is totally curved, rather than rigid. "For whatever reason, people seem to enjoy the softness of a curve." He mentioned the Renafssance Center and the Hyatt Regency in Desrosiers is the thord generation of DesRosiers is the third generation of DesRosiers is the third generation of

torn as examples of the use of curved lines and open interiors.

DesRosiers is the third generation of his family to be an architect. His father, Arthur, designed many, buildings and churches in the metropolitan area. The younger DesRosiers some strong beliefs about his profession.

"I feel very strongly about contemporary architecture because it gives you the flexibility of design for today's lifestyles.

"I have three design concepts, the baiding must function for its intended purpose... It must be economically feasible... and it must be aesthetically pleasing to the eye.

As he talked about his philosophy, it was obvious that this energetic, enthu-

siastic professional is sun-oriented, view-oriented and energy minded. "We have such small quantities of sun in Michigan that I think we should be able to enjoy it as much as pos-sible."

sible."

DesRosiers uses skylights and lots of windows to bring in as much light, sun and view as possible.

"When there's a view. I make certain that each room of the home shares the view, and most of them will have viewing dock."

shares the view, and those of the have viewing decks.

While use of glass and concern about saving energy may initially seem like

ompatable. The use of double- or triple-insulated

INSULATION IS another key to energy savings. DesRosiers will frequently call for two by six-inch wood framing with six inches of fiber insulation plus one inch of Styrofoam. Even modified somewhat, this type of

"How Great Thou Art"

The Fine Arts Committee of Nardin Park United Methodist Church will host a "special Lenten treat," said Barbara Reid, spokeswoman for the committe, at 8 p.m., Feb. 8, in the church sanctuary.
"How Great Thou Art," a program of stereo music, photography and poetry, is offered to the community without charge, at the church on Eleven Mile, west of Middebelt.
The program will be given by Mrand Mrs. Robort Bash of Allen Park, using four projectors, three screens and a battery of electronic equipment. During the 78-minute program, the

viewer-listener is made aware of the "beauty which surrounds us every day if we just take the time to look and listen," Mrs. Reid said.

Bush is a graduate of Brooks Institute of Photography in Santa Bar-bara, Calif., and has just recently retired as chief photographer at Ford Motor Co.'s design center.

Mrs. Bush is a secretary at Ford's and enjoys writing, some of which is included in the presentation.

A free will offering will be taken and a fellowship hour will follow the

with glass, non-glass walls and ceil-ings properly insulated, heat loss is minimized, he said.

As far as solar heat in Michigan is concerned, DesRosiers sees it only when coupled with conventional heat-ing systems.

when toupied win convenions in the ing systems.

"We must have both, we can't rely on solar heating because the sun in Michigan is too intermittent and we have no way to store solar energy for extended periods."

DESROSIERS, WHO SAID, he has resEarched solar heating extensively, believes that if solar heating is to be properly used, it should be in sunshine states such as parts of California, Utah

and Arizona and let them ship their excess conventional fuels to areas where total solar heating isn't feasible.

He said that if homeowners would install windmills to supplement elec-trical power, there could also be a siz-eable energy savings. However, the windmill will take a long time to pay for itself

windmill will take a long time to pay for itself.

It pleases DesRosiers most when former clients living in his homes in North Wabeek, on area lakes or in nearby suburbs tell him that living in one of his homes is like "always being on wording."

one of its names is nice always being on vacation. Then, he knows, he succeeded in doing what he set to do—to provide a house that meets the family's needs, that is devoid of boredom, that is continually exciting to live in.

Sambo's is just what the family ordered.

Here are some of our customers' favorite selections from our two big menus -one for grown-ups and one for children.

Dinners

... served any time. Top sirloin steak. 3.75
New York steak. 3.95
Captain's platter (shrimp. ocean fish, shellfish). 3.65
Country fried steak. 2.95
Deep fried chicken. 2.95
Deep fried shrimp. 3.45

Deep med chicken 2.93
