NOTED PHILANTHROPIST TO VISIT THIS SECTION

L. T. Cooper, Millionaire Manufacturer, Gives Large Part of Income to Charity-Sprang Into Fame Through His New Health Theories, Based on What Is Known As the Tanlac Treatment.

NOT in recent years, perhaps, has the coming of any public character aroused such widespread interest as has the proposed visit to Detroit and other Michigan cities of L. T. Cooper, the Millionaire Philanthropist. Mr. Cooper is described as one of America's foremost leaders of advanced thought, and sprang into fame and fortune through his new health theories based on what is known as the Tanlac treatment. He never ceases to surprise you with the infinite variety of his knowledge, and its absolute correctness and throughness. In several of the larger cities—especially throughout the South and West—he has done a great deal of relief work among the poor.

Mr. Cooper is a farm believer in prac-1 and has been known to authorize a state of the control of the control

Mr. Cooper contends that nine-tenths f the diseases and ill health of the resent day American is due to faulty igestion and improper assimilation of he food, which finally produces a tuffed up condition of the vital organs.

sturies up condition of the vital organs. It has been said that Tanlac, his celebrated medicine which is now accomplishing such remarkable results throughout the country, not only quickly overcomes all cutarrhal inflammations of the mucous membrane, but acts directly in the correction of stomach, liver, kidney and intestinal disorders.

orders.

absolute correctness and thoroughness. In several of the larger cluise-specially throughout the South and West—en has done a great deal of relief work among the poor.

Mr. Cooper is a firm believer in practical philanthropy and his relief work is familiar to charity workers of the country. His hoston, Texas, a few round direction of leading charity workers, one thousand dresses of excellent quality to the poor women and children. In San Antonio the following week, he donated another thousand dresses to the poor of that city and a few days later four hundred of the garments were provided by him of the poor women and children of Galveston. Laddes prominent in social life and many prominent citizens of these places assisted and choperated with Mr. Cooper's representatives in this worthy cause.

INSECTICIDES ARE COSTLY

"Kedzle Mixture" May Be Substituted, However, for Arsenate of

However, for Arsenate of Lead.

Enti Lansing, Mich.—A method for effecting an economy in the use of tending an economy in the use of tending the state of the war. Is suggested by Prof. Rufus H. Pettit of M. A. C., who is recommending that where it is possible, "Redrie mixture" be substituted for arsenate of lead," according to Professor Pettit, "has become a stand-by for so long that we are apt to for seit and the stand of the sta

ever-present potato beetle.

"Doctor Keddie gave the following as directions for the preparation of this spays:

"Dissolve the arsenic by boiling with entropease of soda to insure complete solution, which solution can be kept ready for making a spraying solution whenever needed. To make the material for SoD gallons of spraying mix ture, boil two pounds of white arreads with eight pounds of saleoda (crystals of carbonate of soda—washing sort with eight pounds of saleoda (crystals of carbonate of soda—washing new consultation of the control of the control of soda—washing or out the purpose. Boil for 16 minutes, or until the greenic dissolves, leaving only a small muddy sediment. Fut this solution in a two-gallon jug and inhel Polson, stock material for spraying mixture.

"The spraying mixture can be prepared whenever required, and in the quantity needed at the time by slaking two pounds of lime, adding this to 40 gallons of water; pour into this a pint of the stock arsenic solution. Mix by stirring theroughly and the spraying mixture is ready for use. The arsenic in this mixture is equivalent to four ounces of paris green.

"The not or jug must never be used for this mixture."

If an additional pound or two of time be added to the mixture, at will help to make the application terms.

If an additional pound or two of lime be added to the mixture, it will help to make the application perma-nent and conspicuous without in any way interfering with its effects. In using it, the extra lime should be added.

BLISTER RUST HAS FOOTHOLD

East Lansing, Mich.—White pine blister rust, the parasite which has been killing Europe's white pines on as vast a scale as her guns have been killing men, has gained a foothoid in Michigan, and thiness controlled, will reject here: it is feared, its destruct tive work abroad, the Dast for some time, and has spread threateningly, but it was believed by Michigan foresters that it had not reached this state. In rejections last season falled to disclose its presence, but more recent examinations have demonstrated that the rust has not only begun its work in Michigan, but has been here for years. One nursery was found where imported trees ten years old were afflirted with the parasite.

During the coming summer, accord-

the parasite.

During the coming summer, accordingly, three foresters will take the field in Michigan to ferret out the affected districts and inaugurate control measures. The latter will require the cooperation not only of citizens generally, but of farmers in particular. The inspectors will begin their work at once.

The Elephant.

Bobby a Muncle boy of four, went to a circus when it showed there this season, and in the menagerie test received a sack of peanuts with which to feed the elephant. His parents stood a short distance away talking to a group of friends. Soon Bobby came back with his sack still full.

"Didn't you feed the elephant any peanuts?" he was, asked by a young woman of the party.

"Nom," replied the last, soberly. "I condign't rell which end to feed 'em to."
