

## YOU NEED NOT SUFFER WITH BACKACHE AND RHEUMATISM

For centuries GOLD MEDAL Haerlem Oil has been a standard household remedy for kidney, liver, bladder and stomach trouble, and all diseases connected with the urinary organs. The kidneys and bladder are the most important organs of the body. They are the filters, the purifiers of your blood. If the poisons which enter your system through the blood and stomach are not strictly thrown out by the kidneys and bladder you are doomed.

Weariness, sleeplessness, nervousness, dependency, backache, stomach trouble, headache, pain in loins, and lower abdomen, gallstones, gravel, difficulty when urinating, cloudy and bloody urine, rheumatism, sciatica, lumbago, all warn you to look after your kidneys and bladder. GOLD MEDAL Haerlem Oil Capsules are what you need.

They are not a "patent medicine" nor a "new discovery." For 200 years they

have been a standard household remedy. They are the pure, original imported Haerlem Oil your great-grandmother used, and are perfectly harmless. The best thing, soothing oil exists into the cells and lining of the kidneys and through the bladder, driving out the poisonous germs. New life, fresh strength and health will come as you continue this treatment. When completely restored to your usual vigor, continue taking a capsule or two each day. They will keep you in condition and prevent a return of the disease.

Do not delay a minute. Delays are especially dangerous in kidney and bladder trouble. All reliable druggists sell GOLD MEDAL Haerlem Oil Capsules. They will refund the money if not as represented. In three sized, sealed packages. Ask for the original imported GOLD MEDAL. Accept no substitutes.

It is estimated that this year's business in electric ranges will be in the neighborhood of \$3,000,000.

### RECIPE FOR GRAY HAIR.

To half pint of water add 1 oz. Bay Rum, a small box of Barbé Compound and 1/4 oz. of glycerine. Any druggist can put this up or you can mix it at home at very little cost. For directions for mixing and use come in each box of Barbé Compound. It will gradually darken streaked, faded or gray hair, make it soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off. Adv.

The top of a new table is hinged to fold back and reveal a writing desk with its usual accessories.

Important to Mothers. Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it bears the

Signature of *Dr. J. C. Ayer*. In Use for Over 30 Years. Children Cry for Fitcher's Castoria.

The house of a tidy woman and a motion to adjourn are always in order.

Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative, three for a cathartic. Adv.

## Fads and Fancies Of Fashion

Fabrics and Afternoon Frocks.

Designers appear to have looked over the lineup of spring fabrics for afternoon frocks and to have come to some conclusions in common. Awaiting their critical and speculative eyes were printed tulletrims and tulletrims in figured and plaid patterns, velvets and organdies—plaid, striped and plaid; crepe de chine, and other crepes—and, above all—crepe georgette. Colors and color combinations were lovely. It is noticeable that, having viewed them, they found the material a challenge to their genius. Fabrics and design seem to be perfectly suited to each other in the new frocks for afternoon wear—that is the dress that does service for many occasions, now formal or informal. "I must make a beautiful dress, and I must make it simple," appears to be the iron rule which the creator of styles has laid down for himself this spring.

In the picture a frock of crepe georgette shows how successfully this rule may be followed. Here is a plain, straight skirt adorned with two groups of fine tucks and nothing else. It is

gathered into an underpetticoat of silk at the bottom. Over it a Russian blouse, feathery its always good style. It is handsomely braided in a design made up of squares with soutache braid in the same color as the crepe. The blouse has two small pockets set on with a row of little satin-covered buttons at each side and a draped collar of satin joined by the same effective means to the crepe. The sleeves are plain, flaring at the wrist, where there is a wide band formed by the braided pattern. A very long fringe of satin is wrapped twice about the waist and looped over at the front. The ends are finished and weighted with satin-covered ornaments. Many of the new frocks of this character show plain and plaid tulletrims in combination. With crepe georgette sleeves matching the plain silk in color. The glaucous plaids in tulletrims are effectively made up in this way. Plain georgette with bands of plaid tulletrims and plain fabrics trimmed with pinkettes in cross-hatch effects are among the popular combinations.

Hats for Early Spring—Or Now.

We used to wait for the arrival of spring or for signs that it was within hailing distance before we clothed our heads in hats that take no thought of winter, even in below-zero weather. But a new order of things has come to pass and now we indulge ourselves in hats that herald the spring and go out to meet it while it is yet afar off—in Northern climates. They are not spring hats and they are not winter hats. They are cheerful hats with a thought of summer in them, but substantial enough to brave the snows of late winter.

Here are three of these smart hats that are minded to turn their allegiance from winter to spring and pin their faith to its coming soon. They have satin crowns and brims of a braid which is variously called "chevron," "caterpillar" and "carpet" braid. "Caterpillar" fits best. It is a fuzzy, substantial looking and soft braid that looks wonderfully well with satin. It is shown in all the lovely and soft spring colors. These hats are usually faced with crepe georgette, and their trimmings are glazed or lacquered flowers and fruits.

Brimlets that have heretofore been used for spring-summer hats are brought into service for the demisen-

son by covering them with a hard lacquer which gives them a high, hard luster or polish. For February and March very bright red hats—a cherry red—are made of these braids. Cherries are a favorite trimmings for them, too. Then there are small all black turbans made of "patent leather"—that is millinery patent leather in the form of braid or of millinery braids (lacquered or finished into the most lustrous surfaces). These small, smart, brilliant hats are for any time and look quite equal to meeting any emergency. Nearly always they are in all black, trimmed with small ribbon ornaments or little veils. These are also lacquered and will defy the strongest March wind that blows to disarrange a single feather in them.

Julius Bonnelly

Children's Bonnet. In the dressier types of children's hats the tiny poke is enjoying its usual success. In its newest forms the edges of the brim at the sides are folded back about an inch, while the portion that extends over the face has something of a visor appearance.

## LUCKY STRIKE CIGARETTE

Until this new "smoke" was made you could never have a real Burley tobacco cigarette. It's the best yet.

### IT'S TOASTED

The toasting brings out the delicious flavor of that fine old Kentucky Burley. You never tasted anything so agreeable—think what roasting does for peanuts.

## Win the War by Preparing the Land Sowing the Seed and Producing Bigger Crops

Work in Joint Effort the Soil of the United States and Canada CO-OPERATIVE FARMING IN MAN POWER NECESSARY TO WIN THE BATTLE FOR LIBERTY

The Food Controllers of the United States and Canada are asking for greater food production. Scarcely 100,000,000 bushels of wheat are available to be sent to the allies overseas before the crop has been raised. Upon the efforts of the United States and Canada rests the burden of supply.

Every Available Tillable Acre Must Contribute; Every Available Farmer and Farm Hand Must Assist

Western Canada has an enormous acreage to be seeded, but man power is short, and an appeal to the United States allies is for more men for seeding operations.

Canada's Wheat Production Last Year was 225,000,000 Bushels; the Demand From Canada Alone for 1918 is 400,000,000 Bushels To secure this she must have assistance. She has the land but needs the men. The Government of the United States wants every man who can effectively help to do farm work this year. It wants the land in the United States developed first of course; but it also wants to help Canada. Whenever we find a man we can spare to Canada's fields after ours are supplied, we want to direct him there.

Apply to our Employment Service, and we will tell you where you can best serve the combined interests.

Western Canada's help will be required not later than April 5th. Wages to competent help, \$50.00 a month and up, board and lodging.

Those who respond to this appeal will get a warm welcome, good wages, good board and find comfortable homes. They will get a rate of one cent a mile from Canadian boundary points to destination and return.

For particulars as to routes and places where employment may be had apply to: U. S. EMPLOYMENT SERVICE, DEPARTMENT OF LABOR

As Age Advances the Liver Requires occasional slight stimulation.

**CARTER'S LITTLE LIVER PILLS** correct CONSTIPATION

Small Pill, Small Dose, Small Price, But Great in its Good Worth

Colorless or Pale Faces usually indicate the absence of Iron in a condition which will be greatly helped by Carter's Iron Pills

## Scenes of Prosperity Are Common in Western Canada

The thousands of U. S. farmers who have accepted Canada's generous offer to settle on homesteads or buy farm land in her provinces have been well repaid by bountiful crops of wheat and other grains.

Where you can buy good farm land at \$15 to \$30 per acre—get \$2 a bushel for wheat and raise 20 to 45 bushels to the acre you are bound to make money—that's what you can do in Western Canada.

In the provinces of Manitoba, Saskatchewan or Alberta you can get **HOMESTEAD OF 160 ACRES FREE** and other land at very low prices.

During many years Canadian wheat fields have averaged 20 bushels to the acre—many yields as high as 45 bushels to the acre. Good crops also of Oats, Barley, and Flax.

Wheat Farming is as profitable an industry as grain raising. Good schools, churches, markets convenient, climate excellent. Write for literature and particulars as to reduced railway rates to points of immigration, Ottawa, Can., or to M. V. McALPINES 178 Michigan Ave., Detroit, Mich. Canadian Government Agent
