

Don't Keep Your Valuables

in your house. Put them in our

SAFETY DEPOSIT VAULTS

Is it not just carelessness to keep your valuable papers, heirlooms and jewelry in the house? Fire may burn them or burglars break in and steal them. The safe, same way is to put them in our safety deposit vaults; then you run no chance of losing them, or of being murdered. We will rent you a

Safety Deposit Box for \$2.00 a Year and up.

READ EVERY PAGE

Do you read every page of the Enterprise? In calling attention to some of the good things on the inside of the Enterprise do not think we are "blowing our own horn" too loudly, for it is not our intention to in any way "boast" of our achievements, but simply to let you know what you are missing if you read only the outside pages—the home print part. Give us your attention for just a minute or two.

The inside pages of the Enterprise comprise of articles written and prepared by experts—men

many times the price of a year's subscription.

Gov. Sleeper has issued his Arbor Day proclamation, which will occur on Friday, May 3rd, in the hope that both old and young people will see the need of not only planting trees, as has been the Arbor Day custom, but plant garden plots with potatoes, corn and beans and other vegetables, and the destruction of the rust producing barberry bush.

The Bureau of Animal Industry of the United States Department of Agriculture has named Dr. Mary Anderson, agricultural institute worker of Peninsula, Ohio, to encourage in Michigan the production of cottage cheese on farms and also to stimulate its use in homes.

Parents of soldiers in camps are warned by the War Department of a swindle which has been successfully operated in various camps. A telegram is sent informing that the soldier has a furlough, and requesting funds by wire to come home, waiving identification. The rest is a mere matter of detail. Parents and friends should be warned of this game and of the similar one where the telegraphic request is to mail money to the soldier, care general delivery.

The United States Department of Agriculture again advises farmers to sell their hens gradually and not to glut the market immediately after April 20, when the restriction against sale of hens was removed. Hens should be sold gradually. This will stabilize the market and bring better prices for them. It also will mean more eggs. Every laying hen at this season produces eggs at far less cost for feed than during the winter.

An engine that translates gas into a new kind of thrilling power through the "Hot-Spot" and "Ram's-Horn" Manifold—Chalmers devices

Power to take a hill, and power to pass the other fellow are still claimed by many car makers; but here's a car that puts such expressions into the dark ages of automobilism. It is the current Chalmers, equipped with the famous "Hot-Spot" and "Ram's-Horn" Manifold, which wrings from gas more power than was ever taken out of gas before.

But not merely brutal power (for that it has), but a newer kind, a softness of power that is as thrilling to bear witness to as the technique of a great musician.

Accomplished how? By those two great devices: a "Hot-Spot", which fairly cooks the gas, then "cracks it up fine as a powder", and the "Ram's-Horn" Manifold which "sets it down" in the combustion chambers with celerity and without disturbance.

So that when the spark touches it off, it gives nothing but power; soft, harnessed, controlled power that you will never forget once you have had its feel.
