NOTIFYING RELATIVES OF CASUALTIES

Relatives of soldiers named in casualty lists forwarded from France ordinarily are notified within 24 hours after receipt of the lists, according to a statement authorized by the war department. A "statistical division," with a staff of officers and a corps of stenographers, gives all its time to the maintenance of files of soldiers' names and addresses. This division notifies relatives.

A copy of the roster of each contingent sailing to join the Expeditionary Forces is filed in card index fashion, each card bearing the name of one soldier, his organization, and the name and address of parent or other relative or friend designated by him to be notified in emergency. When a casualty list is received from Gen. Pershing each name tabulated from the American Expeditionary Force is listed with the emergency address on file in the card index. As rapidly as the new list with emergency addresses is built up the telegraph clerks get duplicates. These clerks already are supplied with blank telegrams which require only the relative's address, name of sender, nature of casualty and the date, and filling in the blank spaces they get the telegrams off as quickly as possible. In addition to maintaining the telegraph blanks for the sake of speed the statistical division is supplied with sets of form letters to be filled in and mailed when further details are available.

While relatives are generally in receipt of information within 24 hours after the cables are received, delays are sometimes due to clerical errors caused by the fact that names must pass through so many hands in France and in America, incorrect emergency addresses turned in by soldiers, removal of families to addresses other than those listed, and the occasional necessity for cabling back to Gen. Pershing to

Keep the Children Well

To keep the little ones well, sturdy and happy, free of coughs, colds, croup, hoarse voices and influenza threats, use Felsch's Honey and Tar. It is carefully made of selected remedies that loosen and break up a cough, stop croup and soothe an itching, inflamed throat, and it is full of all nutrients. The pleasant taste of Felsch's Honey and Tar is very helpful in whooping cough, and the real test is to see that it keeps children's throats clean.

M. T. Davis, East 11th, W. Va., writes: "One of my nephews had a cold and cough with croup. They gave him a dose and bought a bottle of Felsch's Honey and Tar and before morning the child was entirely recovered."
