FARMERS BY STATE

Can Secure Timely Assistance From Specialists If They But Know How to Go About It.

M. A. C. IS HEADQUARTERS

Making Up of Rations, Testing of Soils and Combating of Plant Dis-eases Few of Things Col-lege Docs.

By EARL R. TRANGMAR.

age. Hast your the college occurred with message from him.

"My jelds have jumped up for buyles to the agre."

Now'! cannot be said that Johnson is by 'any mens an average farmer. If he was he would never have thought of submitting and is made to M. A. C. fr. thought he state I have learned that most agriculturists, and this leadules many a prosperous tarner, are but it the familiar with the opportunities which exist for the securing of assists that about all the college does the state. In some quarters the idea still personnel to be state I have learned that it is threefold. For headies educating state is threefold, for headies educating state is threefold. For headies educating state is threefold in the country will be farmer directly. It is with this service that dwellers in the country will be farmer directly. The country will be farmer directly in the country will be farmer directly. The will be farmer of the country will be farmer directly. The will be farmer state in the country will be farmer directly in the country will be farmer directly. The will be farmer state in the country will be farmer directly. The will be farmer state in the country will be farmer directly and the country will be farmer will be farmer will be farmer and you stroll lato your tuber plants'in a bad way, it is possible to make your country and the country will be farmer years, the meetings will be instructed in the college ob calling in the post of the binger probably secure of the many afficiency of the college of the minute of the college of the since of the college of the minute of the college of the minute

is sufficient to induce the unwelcome visitors to forage elsewhere.

In truth the services which the college has developed and placed at the disposal of the farmer are almost without end. If a poultryamn desires to secure a demonstration of the practice of culling focks, a demonstratior is obtainable; if a farmer wishes to learn a method of farm neconanting that will enable him to put his business you he endiced of farm meaning that will enable him to put his business you he endiced of farm meaning that will represent the service of the confice of farm meaningement will bring results; if the farm is a little wetter in spots than is desirable polatiers on drainage can be had from the department of farm mechanics, and if you will take the matter up with your countries of the college to call and put on a brainage demonstration for the entire community.

The proposed of the proposed of the consuming the consument of the consument of the proposed of

Michigan Agricultural College.
East Lausing. Mich.—Harvey Johnson was ford and master over a farm in Kent country—a well groomed place with 300 brond, rolling acres of thoroughly fitted land. Every building and animate bespice able management. But even so, Johnson was not whole yeother. His wheat, he observed was yielding only 16 to 20 bushels to the college to cell and put on a fraining demonstration for the entire was yielding only 16 to 20 bushels to the terror was read to a bureau of specialistic—men engaged by the state to be used for the toring up his yields, even with liberal manurities and the planting of superior strains lof, grain,

"Must be something else lacking, in the soft, when cointrouted with problems somewhat beyond the reach of his own the gottlered up a number of typical countries, and forwarded them to the bright of the soft, who was the college. So now he gottlered up a number of typical camples of his soll, placed them in bottles, and forwarded them to the burgestion—that was two years.

"About all your land needs," the department wrote back in a few days, "is a good does of line," Johnson acted on the burgestion—that was two years.

Now it cannot be faid that Johnson is by 'ally ments an average farmer."

If he was, he would never have thought of submitting a soil sample to M. A. C., for case and the surgestion—that was two years.

Now it cannot be faid that Johnson is by 'ally ments an average farmer."

If we was, he would never have thought of submitting a soil sample to M. A. C., for containing the proposed with the college might be like the college might be like the college to cell and put on a fraining demonstration for the entire college to cell and put on a fraining demonstration for the enter of the college to cell and put on a fraining demonstration for the enter of the college to cell and put on a fraining demonstration for the enter of the college to cell and put on a fraining demonstration for the enter of the college to cell and put on a fraining demons

UP TO AMERICA TO WIN WAR

Collapse of Russia Places the Birden of Eliminating the Hun on Shoulders of the Yanks.

Daily it grows more certain that the world war is to be fought titl one side or the other is prostrate. The war would have been over months ago if the tendency of the tendency of the tendency of the tendency of the hundred that the tendency of the north become an inert and impotent mass at the mercy of Germany. And as for Russia, fee fate will be determined by the world congress that will write the peace when the war is over. It will be about the mightiest Job human statecenft ever undertook and the mightiest Job human between the war is over. It will be about the mightiest Job human between the mig

FARMERS ARE WORKING-HARDER

Ing with Juscet enemies of agriculture the college maintains a corps of men who are members of the dequirement of entomology. If the sende is becoming to penjulous in the orchard, or the web worm is taking too miny liberies, a letter to the entimologists will bring a prescription which as a rule is sufficient to induce the unvelcome visitors to forage elsewhere. Daily it grows more cortain that the world war is to be fought till one side of the collection o

to your druggist at once and get in Capsulps. Aone oner genuser—and Worse Tran the Bacher's Union.

In the reign of Elizabeth every beard of a forhightist growth was subject to in tax of \$3 ceats. Peter the Great, in 1706, imposed, a tax upon the beardist of the Plassian nobles of 100 rubbles, while the common people's beard tax amounted 10 a [kopec. This tax caused much alisastization, but in spite of this the Impost was extended to \$5. The Common people's beard tax amounted 10 a [174]. The tax on beards was confrued by Catherine I in 1726, in 1743 by the Empress anne in 1731, and in 1743 by the Empress and the subject of the s
