HAD SEEN THEM "AT WORK"

Tommy Had Little Need to Puzzle His Brains Over Question Propounded by Teacher.

Here is a little story that was told at a social session by Representative Hubert D. Stephens of Mississippi, as an illustration that the best industrial results cannot always be obtained through team work.

Some time since, the teacher of a public school in a country town was instructing a juvenile class in mathematics when she turned to a small boy named Tommy.

"Tommy," said she, "if your father can do a piece of work in six days and your uncle Jim can do it in seven days, how long would it take them to do it together?"

"About ten thousand years," was the rather startling rejoinder of Tommy.

"Ten thousand years?" exclaimed the teacher, "why, Tommy, what do you mean?"

"I mean," was the prompt response of Tommy, "that if you put them to work together they would sit on the fence, smoke and swap fish stories."

He Got What Was Needed. Church—You know Finbush? Gotham—Oh, very well.

"He's a generous soul, don't you think?"

"How so?"

"Why, I met him downtown today when it was raining, and he had an umbrella and I had none."

"And he took you in tow?"

"That's it. And he said we needed the rain badly."

"He said that, did he?"

"Yes; and he carried the umbrella so I got most of the rain."

"And I suppose when she feels like swearing she just gives a cursory glance."

LACK OF DRAINAGE HOLDS BACK FARMS

Wet Lands in Much of State Cause Loss to Farmers, M. A. C. Says.

NEW LAWS ARE NEEDED

Present Method of Collecting Drain Tax Is Too Burdensome, According to O. E. Robey.

By O. E. ROBEY, Specialist in Drainage Michigan Agricultural Experiment Station.

East Lansing, Mich.—In these days in which we are taking all conceivable steps to protect our crops against all possible enemies and the world from famine we should not neglect of the means of crop producing value of proper drainage.

Whenever we see an area under water which would become very good farm land if properly drained, but which is not bearing an edible blade of grass we wonder why we are not making better use of it.

Whenever we see an area under water which would become very good farm land if properly drained, but which is not bearing an edible blade of grass we wonder why we are not making better use of it.

In the case of the undeveloped land we do not expect a crop. We do not expect our high-priced water to be used to cultivate it nor do we waste our high-priced seeds. Our direct loss here is not great.

This latter type of land, the kind that looks dry but actually is wetter than Wisconsin is losing more for the Michigan farmer today than are the arid lands of the West.

ADDED BEAUTY TO GARDENS

World Owes Debt to Frenchman Who Improved on the Glory of the Lilac Blossom.

One of France's war gardeners of 1870-71 won immortality by studying his plants, instead of tending his garden merely as a way to help out with the food supply.

In 1871 Victor Lemoine began his experiments in cross-fertilizing different species of lilac. He took up this work to get his mind away from the troubles of his country, for a German prison was quartered in his native town, Nancy, and the rest of France, except the doomed provinces of Alsace-Lorraine, was slowly being back its freedom from the same hated presence.

That was the origin of the wondrous group of shrubs known today throughout the world as "French lilacs," with their great trusses of beautiful bloom.

Don't Neglect a Bad Back!

It's Mighty Poor Policy to Worry Along Thus Handicapped When Health and Strength is So Needed

The man or woman handicapped with a bad back in these times when physical fitness is so necessary, is indeed crippled. It might be policy to worry along with an aching back day after day when it is neglected and the simplest duties are a burden.

Personal Reports of Real Cases

A MICHIGAN CASE. F. Lancher, blacksmith, 70 S. Marshall Ave., Marshall, Mich. says: "I suffered from sharp catches across my back at times and a soreness in the region of my kidneys. My work is hard on the kidneys and if I did much heavy lifting, the trouble was worse. My kidneys were irregular in action and the kidney secretion scanty. I got Doan's Kidney Pills and they strengthened my back and benefited me in every way."

Another Michigan Case. Mrs. L. C. Ballard, Bortien St., Paw Paw, Mich., says: "My kidneys were always weak. I had severe pains and a soreness across my back. I felt weak and run down, and I had dizzy headaches. My kidneys were irregular in action and I suffered continually. My feet and ankles became swollen. Five boxes of Doan's Kidney Pills cured me of all the back-ache. I didn't have dizzy spells or the severe headaches I was subject to and my kidneys were in good order."

Tired Nervous Mothers

Should Profit by the Experience of These Two Women. Buffalo, N. Y.—"I am the mother of four children, and for nearly three years I suffered from a female trouble with pains in my back and side, and a general weakness. I had professional attendance most of that time but did not seem to get well. As a last resort I decided to try Lydia E. Pinkham's Vegetable Compound which I had seen advertised in the newspapers, and in two weeks noticed a marked improvement. I continued its use and am now free from pain and able to do all my household work."—Mrs. E. B. ZELINSKA, 202 Weiss Street, Buffalo, N. Y.

Portland, Ind.—"I had a displacement and suffered so badly from it at times I could not be on my feet at all. I was all run down and so weak I could not do my household work, was nervous and could not lie down at night. I took treatments from a physician but they did not help me. My Aunt recommended Lydia E. Pinkham's Vegetable Compound. I tried it and now I am strong and well again and do my own work and I give Lydia E. Pinkham's Compound the credit."—Mrs. J. O. That's what is done in making Grape-Nuts food—barley and other grains are used with wheat. This adds to food value and flavor and the sum total requires less wheat. The malted barley in Grape-Nuts also helps digest other foods. For an economical, nourishing and delicious food, try Grape-Nuts.

Striped Hits Barley. A disease known as the barley "leaf stripe" is reported by the department of plant pathology of M. A. C. to have been the most appreciable loss this season to Michigan barley growers. The disease produces stunted plants with blighted heads, and the leaves are striped so that they look like ribbons across. According to college pathologists, the insect effective way to get rid of the trouble is to secure seed that is clean and to avoid putting in another crop of barley on the field from which the diseased crop was removed. Inasmuch as growers very rarely follow barley with barley, the securing of clean seed from neighbors whose fields were free from the disease is considered to be the most important precautionary measure.

Which Judge is Right? An Eastern judge the other day found a man guilty of disorderly conduct for kissing his wife when she was sitting in the automobile and to refuse to be kissed if she doesn't want to be kissed. This judge said, adding, "and she doesn't forfeit this right when she marries the man."
