orities Think Shoppers Can Ger ong Without Toy Wagons in Which to Carry Home Goods.

Which to Carry Home Goods.

R. L. Flood of the quartermaster's corps of the United States army, assigned to work with the Indiana state of administration in establishme coal shipment priority for indistributions of the manufacturity of indistributions of the coal factors waven in the state, assign information regarding on of the coal factors waven in the state, assign information regarding the nature of week beard one at the factories. He asked the owners to give their results of the coal factor part of the their results of the coal factor part of the their results of the coal factor part of the their results of the coal factories, as for sheltering their compart should be classed as essential and receive coal priority.

be chassed as essential and receive con-priority.

One company engaged in the manu-facture of little "express wagons" on which send how may be seen consis-ing in every city, presented the claim that it should be placed on the pri-ority list.

"Since the cosh-and-curry plan wend into effect and merchants have stopped delivering goods, the toy wagons such as we made have become essential to the shopping public," was argued in the sompany's questionnaire.

The company's claim was rejected.

Foiled.

Feeding Trials Conducted at M. A. C. Discourage Their Use for Hogs.

COST IS HIGH; GAIN SMALL

Rich in Nutrients, Porkers o Relish Southern Product, iment Station Reports.

By H. W. NORTON,
Investigator of Live Stock Problems,
Experiment Station, Michigan Agricultural College.
East Lausing, Mich.—A constant bedfellow of high prices, whether these
high prices be of chawlengers. Experiment Staton, Michigan Agritutural College.

Anst Lansing, Mich.—A constant bedclow of high prices, whether these
high prices be of chewing gun, locamicrost of freeds for itse stock, is
the substitute—a something 'just any
polections'. War times are their
leveling are more than will just your
polections'. War times are their
leveling some and with them counpolections. Often it happens that substitutions or almost a resistent the
intermediate of some wind commonly
telled in the substitution of the second of the
lines we also encounder products
which while seeming to have all the
amerits of the original had an else and
had been as a continual products
which while seeming to have all the
shorthing which unfirst here for our
prices.

This was the experience alutated at
some close by many Michigan pork produced in the substitution of the
worker hears as a opticures of
wheat middlings, and the processor
control by feeding experiments at

The velvet been is a Southern crop

The results were as follows: The pigs in to No. 1, fed velvet cases and pods, unground, from a self-ceder, consumed 461 pounds of feed in the 25 days they were funder test. It he earl of the 28 days they had made a 2nd from an average latint cells of 112 pounds each to a final-toches wight of 94% pounds, or an accuracy daily gain per pig of only outh, it was necessity to feed 22.27 tool hours of gain—for an average each count of \$41.73 for each 100 pounds in the construction of the pigs of the state of the pigs of the pigs of the pigs of the state of the pigs of the pigs of the pigs of the state of the pigs o

subs showed an averige failty gain of the control o

erage initial weight of 121 pounds to an average fluit weight of 277.7 pounds. The average duly guin per pig was 1.6 pounds. The cost of the feed for every 100 pounds guin put on by this

The average daily gain per 10g was 1.6 pounds. The condition of the feed for every 100 pounds gain pint on by this lot years steel gain pint on the feed gain the results of produce a pound of gain and the cost per pound of gain was directly proportioned to the amount of velvet bean feed in the ration. The rations with the least velvet bean feed gave the best results, The results were so massificatory with all the pigs upon which celvet bean from the pigs on substitution which we were so massificatory with all the pigs upon which celvet bean from four weeks. It was found too, that gridding pods with the grain mode a feed too high in the ford pigs, while the raw beam themselves were never relished.

Because of this mone of the rutions containing velvet bean feed were suits factory. The pigs did not ent thour rendity, the gains were poor and the feed cost per pound of gain entirely too high.

The pigs in all the lots were given the issue care and restriction prior to the commercian results obtained by freeding varieties and the contrast in making, ento he arriphated to one cause—the unisatisfity of every beans with sheep have not yet been made.

A copy of the experiment station report of this work can be indicated by writing to the "Director of Experiment Stallion. Markigan Architural Cost."

include it must be contessed that are continued to the continue we are not continued to the continued to the

simple of yelvet beings and poins for a given pound of gain—or an average found cost of \$11.75 for each 100 pounds also divided. The seven pies in 16 No. 2, which overved velore beam feed thems and cost grounds together) at the end of the point of the gain o
