

If they appear to be able to do this, they should have enough left over where eight to 10 months on the capital will be enough for them. Brown said. They're just learning the ropes by then.

Not that in commercials use actors who look and act as if they could be your neighbors. They never are. Considering how many television commercials get faked up with fake, it's surprising that the same is not true for actors in commercial characters.

But if you look at the latest American Idol winner, you'll find a guy who would indeed see a Farmington High resident may be even a neighbor. David did. Kirk Kerk of Valley Side Drive.

It's not that he's a Farmington resident, he's a Farmington High senior, holding a Letterman and waiting for the pretty girls in another year as it drives by. Kirk has had a few girlfriends, but he hasn't seen those girls since their part of the commercial was filmed in California, and Kirk's part was filmed in a school parking lot.

It turns how they put these com-

mercial. Farmer Junior High School student got an audition for the part by way of letterman who, because an agent at the Leslie Fellers Agency asked Kirk to do a commercial for a car.

He had two young brothers. Jim went with Kirk and 10-year-old Todd.

But when the commercial was shown, they were a couple of potatoes, said Kirk. They offered Kirk a part the next day. Brother Todd was left out of the money because he was too young to be in the material, rather, were his legs bare enough, said Kirk.

THE CAMERA CREW made about 20 takes of Kirk's segment before the director was satisfied.

It was a commercial, which has been shown during NBC national news and has been

Lucky for the Knocks too, since Kirk is the youngest of eight college-bound children in the family.

Hawks f

Farmington and Farmington Hills may be a step closer to a cooperative fire department with their northern neighbors. Representatives from the two cities met with their counterparts from Novi, Wixom, Walled Lake, West Bloomfield Township and Commerce Township last Monday during the initial session of a mutual aid study group.

A special fire district would be governed by a board of town officials or specially elected members. Contract services would allow a smaller area to pay its larger neighbor for additional fire service. Cooperation between the neighboring towns would be extended to Emergency Medical Service (EMS). Farmington

Together, the towns would be able to afford the operation of an EMS service for their area, according to Deadman.

It's just great," she said.

But for seniors, the game is the perfect culmination of their school years.

"It's something that will stay with us for

Farmington Hills will have to wait seven months for the Michigan Employment Relations Commission (MERC) to decide if the city was guilty of unfair labor practices when it cut the working hours of two volunteer firemen.

The MERC hearing is part of a legal procedure the two men are using to become fulltime firemen. Last week, Oakland Coun-

The firemen, Harold Sweet and John Qunnsenberry contend that their hours were cut because they had tried to unionize the volunteers.

The exam has been set for Dec. 6, ac-

Warming up

Officials say that the men's time was cut because other volunteers had complained about the amount of time the two were al-

Quinsberry, 31, is five foot six inches tall; two inches shorter than the minimum required height for fulltime firemen.

It's difficult to distinguish between the students and the teachers at Harrison High School these days.

Students are making plans to go to the

It is well known that all algorithms for solving the $3SAT$ problem are exponential time algorithms. It is also well known that the $3SAT$ problem is NP-complete. It is therefore a natural question to ask whether there is a polynomial time algorithm for solving the $3SAT$ problem. This is the question that is addressed in this paper.

Signs and excitement increase as the school counts the days until their football

Swordsmen in chartered school boxes, a concession recently granted them by the Farmington School Board.

No agreement was reached that the team should continue this task.

The students, the teachers, the whole school is excited," said Jerry Wilson, ad-

You like to be in the school that's strict and disciplined, right? I think the whole school will go out for the gathering.

[illegible]

Bill Hurley, a counselor, counted the school falls in a blue and gold hawk's beak.

I'm really proud that I'm a Harmon person," said Kim Kijoo, a senior. "Our team is going to the finals. I'm proud of the team."

It's about time. We've had a long fight, since the 1940s, for the A-10.

But for seniors, the game is the perfect culmination of their school years.

Although some discount the idea that the team will lose, others take a more philosophical view of their team's climb to the top.

We're going to have a card section.

It's something that will stay with us for
