

# artsy types

...and for a very nominal amount. The artist of Holy, Greek, Greek Orthodox, Orthodox, Farmington Hills, is the recipient for these great Greek breads and sweets.

One word of caution to the men—if you decide to copy recipes for your best girl, include others besides your mother's. That could go over like burnt stew.

For those with strong romantic inclinations and a bent for poetry, here's another suggestion. Why not write a bit of verse, polish it until it flows like quicksilver, and find either a printer or a calligrapher to print it on paper suitable for framing.

Calligraphy, a form of fine script writing, is now being taught in several area schools. Madonna College in Livonia and Our Lady of Mercy High School in Farmington Hills, to name two. If you can't find someone to do an original, your friendly printer may be able to come close to the real

thing.

If your mind isn't blank, and your pen dry when you sit down to write of love and life, choose some words from "our song" or a favorite poem. Go easy on the amount; eight to 10 lines is about tops.

The amateur photographer has a world of gifts at his fingertips. Have some of your best pictures of friends blown up to 8-by-10 size and matted. Not very expensive, but find a person who doesn't like to have pictures of himself, and you've found a hermit.

The most that's required for many of these gifts from the multi-thumb, is enough lead time for planning and processing.

Plan ahead and have fun.
