Stop Coughing!

The simplest, quickest and best way to stop coughing is to take **Foley's Honey and Tar.**

In it, you get the curative influence of the pine tar and other healing ingredients, together with the mollifying and laxative effect of honey.

Foley's Honey and Tar helps coughs and colds, bronchial and grippe coughs, tickling throat and hoarseness. It is good for croup and whooping cough. It does not contain morphine, chloroform, or any other drug, you would not want to give children, delicate persons or grown-ups. Do not accept a substitute.

"We have used Foley's Honey and Tar in our home for several years, and find it almost invaluable for the most creditable and reliable cough and croup with children. They won't take any other kind, and are never without it in the house and we can't too highly recommend it for coughs, colds or croup, for either grown-up persons or for children."—M. McCall, Athens, Ohio.
