Stop Coughing!
The simplest and best way to stop coughing is to take

FOLEY'S HONEY-TAR

In it, you get the curative influence of the pine tar and other healing ingredients, together with the mollifying laxative effect of the honey. It puts a soothing coating on the inflamed tickling throat, allays bronchial irritation, relieves pleurisy, stops hard wearing coughs and nervous hacking.

W. S. Bailey, Leavenworth, Kan., writes: "I have contracted a severe cold, which developed into a bronchitis and was very distressing. One-half bottle of Foley's Honey and Tar effected my cure and I am now well. It is a most effective remedy."

Plans for Four Inexpensive Garages

EVERY man who owns an automobile should have his own garage. The money that goes for garage rent will in a little while pay for a simple, attractive building to house your car.

Having your machine in your own garage saves time and the closer attention you give your car increases its life and cuts repair bills.

We have a booklet with plans for four garages, one of which will answer your requirements and fit your purse.

While they are designed to be built at a small cost, they are attractive little buildings and will enhance the value of any property on which they are built.

For all outside uses we recommend White Pine as the most economical purchase because it does not warp, or rot or twist, even after years of exposure. It takes paint better than any other wood.

If you are going to do your own building you will find it easy to work and easy on tools.

Phone us and we'll send you our book of Garage Plans, together with our estimate of cost.
