New Telephone Toll Rates

Effective June 13th, 1919

By order of the Postmaster General, new schedules of rates for telephone toll calls became effective 12:01 a. m., June 13th, 1919.

Under these new schedules the "station to station" rate is the base rate upon which all rates for the various classes of service offered, are computed. This rate is determined by the air line distance between toll points and is computed, for the initial period, on the basis of 5c for each 6 miles up to 24 miles and 5c for each 8 miles beyond that distance.

For toll calls where the calling party does not specify a particular person to be reached at the called telephone, the "station to station" rate is charged. This method provides the cheapest and quickest form of telephone toll service.

"Station to station" calls should be made as far as possible by giving the telephone number of the called telephone. Where the number is not known and telephone directory information is not available, the name and address under which the telephone is listed together with the information that it is a "station to station" call should be given to the toll operator.

For toll calls where the calling party specifies a particular person to be reached at the called telephone and the connection is established and conversation held with that person, the "person to person" rate is charged. As this service requires a greater amount of operating effort, the rate for such calls is about one-fourth greater than the "station to station" rate. (Minimum "person to person" rate 15c).

For toll calls on a "person to person" basis, where the calling party, in placing the call, designates a definite time at which he will talk and the conversation is held, the "appointment" rate is charged. As this service involves the making of the appointment in addition to the operating effort necessary for a "person to person" call, the "appointment" rate is about one-half greater than the "station to station" rate. (Minimum "appointment" rate 20c).

For toll calls made on a "person to person" basis where messenger service is required to secure attendance of the designated person at the called telephone the "messenger call" rate applies. This rate is the same as the "appointment" rate, plus any necessary charge for messenger service.

In connection with all toll calls other than those made on a "station to station" basis where the connection is established but the conversation is not held, because of any reason beyond the control of the telephone company a "report charge" is made equivalent to about one-fourth of the "station to station" rate. (Minimum "report charge" 5c, maximum \$2.00).

Reduced rates, applying only to calls made on a "station to station" basis are quoted for toll service between the hours of 8:30 p. m. and 4:30 a. m. The rate between 8:30 p. m. and 12 midnight ("evening rate") is about one-half the "station to station" day rate, and between 12 midnight and 4:30 a. m. ("night rate") about one-fourth the "station to station" day rate. The minimum night rate is 25c. Where the "station to station" day rate is 25c or less no reduction is made for evening or night service.

The time at which connection is established at originating point governs the rate determining whether the day, evening or night charge applies on "station to station" service.

Day rates apply on all calls other than those made on a "station to station" basis, whether they are made during the day, evening or night.

"Collect Calls" or calls for which the charges are reversed (that is, collected from the subscriber at the called station) are allowed only in connection with "person to person" calls.
