"The Bank Good Service is Building"

How much should I give to make this a better world?

A CERTAIN man in New York filled out his income tax report.

It showed an income so large that his tax was 53%. And his total gifts to church and charity for the year were \$148.

Think of it—thousands spent for luxuries and pleasure for himself; and \$148 to leave the world a little better than he found it!

Most of us do better than that; but not so very much better.

Our average daily gift for all church causes is

- less than we spend for daily papers
- less than a local telephone call
- less than a third of the day's car fare
- less than 3 cents a day

No wonder that 80% of the ministers of America are paid less than \$20 a week. No wonder that the church hospitals turn away thousands of sick people a year. No wonder that China has only one doctor for every 400,000 people. No wonder that every church board and charity society is forever meeting deficits, forever passing the hat.

It isn't because we are selfish; it isn't because we don't want to help. It's just because no one has ever put up a great big program to us, and asking to think of the work of the church in a systematic businesslike way.

The Interchurch World Movement represents the united program of thirty denominations. They have surveyed their whole task, no business could have done it better.

They have budgeted their needs; no business could have a more scientific budget. They have united to prevent the possibility of waste and duplication. At least a million dollars will be saved by the fact that thirty individual campaigns are joined in one united effort.

And they come to the men or women who love America—to you—this week asking you to use them as the channel through which a certain definite part of your income can be applied to make this a better world.

Only you can determine what part of your income that should be.

It's a good time right now to answer that question. We're passing through the world just once; how much better will the world be because you passed through?

Fordson's

Will Stand The Gaff

For 1500 hours—almost sixty-one days and nights—a FORDSON motor was run at the Dearborn Factory of Henry Ford & Son, Inc., at a rate of 1000 revolutions per minute, or twice the normal speed.

The test represented three years of actual work in the hands of the FORDSON owner. What was the RESULT?

The wear on any wearing part was so small that it could not be measured with any ordinary measuring instrument.

What Does This Evidence of Inbuilt Quality Mean to You, Mr. Fordson Buyer?

It means wonderful day in and day out service from your machine—it means cheap upkeep—it means few repairs. Mr. Ford spent millions in experiments before he placed a FORDSON on the market. Investigate and join the rapidly growing family of nearly 100,000 farmers who

Farm With A Fordson

Ford
THE UNIVERSAL CAR

Here's the Ford Coupe, deservedly a very popular motor car because of its all-round serviceability. Equipped with electric starting and lighting system and demountable rims with 3½-inch tires front and rear. Large plate glass windows. Generous sized doors—roomy seat; upholstery deep and substantial. Dust-proof and water-proof. Breezy and cheery in fine weather, cozy and dry in bad weather. All the established Ford merits of dependability, with small cost for operation and upkeep. For business and professional men who drive it is ideal and for touring and other pleasure driving it is the one car that delivers all expectations. The demand is large so orders should be left with us without delay.
