## It Can't Be Done

You don't have to be told that you can't put out a real fire with a tin can of water. You know it can't be done, and it seems ridiculous to mention it.

We agree with you, yet it is no more ridiculous than to attempt to operate your telephone company on rates that will not pay operating expenses.

Also, the amount of money required to operate the telephone even a year ago is not enough to pay for present day operation.

Wages have been increased, the cost of everything that goes into telephone construction has been increased. To meet these increases the telephone company must have rates which correspond with all the other increases.

The telephone is operated for your service. We want to make it serve you in the best possible manner. This can't be done without fair rates.

WE MUST HAVE YOUR SUPPORT IF YOU ARE TO HAVE THE TELEPHONE
