Hudson is Best Known For Its Super-Six Motor

OFFICIAL PROOFS, ESTABLISHED ITS SUPREMACY

Few of the 90,000 Super-Six owners have ever tried the limited Hudson speed or power. They realize they have a vast reservoir of ability that is never called on.

Yet no one mistakes it for mere idle surplus simply because it is beyond his ordinary requirements.

For that latent capacity is Hudson's greatest value. It is the life of a car. Because of it, thousands are now getting the fullest satisfaction and service from Super-Six nearly five years old. They know the durability it gives. They know what it means in smooth operation. Their cars have required neither costly replacements nor constant attention to minor disorders.

Moreover, it is good to know that you have at instant call greater speed, acceleration and hill-climbing ability than any other stock car has ever shown.

There can be no question regarding its beauty, its completeness, its fineness—advantages patent to any observer. You will best assure delivery when you want it by speaking for your Hudson now.
