Lie down and be counted.

President Jimmy Carter signed up 51 times.

In America, 3% of the people give 100% of all the blood that's freely donated.

Which means that if only 1% more people—maybe you—became donors, it would add over *thirty percent* more blood to America's voluntary bloodstream.

Think of it!

But forget arithmetic. Just concentrate on one word.

The word is *Easy*.

Giving blood is easy. You hardly feel it (in fact, some people say they feel better physically after a blood donation).

And, of course, everybody feels better *emotionally*.

Because it's a great feeling knowing your one easy blood donation has helped up to *five* other people to live.

So how about it, 1% of America? Are you going to lie down and be counted?

Call your local Red Cross Chapter, or your community's volunteer blood bank. We need you now.

Red Cross is counting on you.
