**The 1980 Buicks.
Some very nice cars and some very
good thinking.
But then, we wouldn't have it any
other way.**

Cars today have to be more than just roomy, luxurious and pretty. They have to offer answers to a whole range of new concerns.

We at Buick have responded. By offering a selection of cars that

provide solutions for your own particular needs.

From Riviera and Electra to Skyhawk and Skylark, we've put some very good thinking into some very nice cars.

They're innovative. Attractive.

And always comfortable. Exactly what you'd expect from Buick. We simply wouldn't build them any other way.

And they're all on display at the Auto Show. See the Buick exhibit.
