If you ignore the litter

Padre Island a sun-kissed haven for people who value solitude

but environmentalists have noted of-tener and oftener that the sandpipers pick their way among the litter that comes in with the tide.

PADRE ISLAND has a dramatic history here, off the shore of tropical southern Texas. The Karankawa Indians, known as the Kronks, summered here centuries ago. They were fierce warriors, nomadic fishermen and cannibals.

Twenty Spanish galleons shipwrecked here on the Devil's Eibow in 1553, stranding treasure that still ures local treasure hunters out with shovels and sticks. History books call it the Flight of the 300, because 300 crewmen fled south down the island with fierce Kroak Indians behind. Only one sailor survived.

In the early 1800s, Padre Balli was given the island as a land grant from King Charles IV of Spain, and during the waning days of the Texas Republic, Texas Rangers left horse tracks on the

The only invaders now are tourists, although the natural landscape and the National Park Service limit what we can do to violate the land.

can do to violate the land.

THE NATIONAL SEASHORE is 20.5
miles of this II3-mile-long barrier island that hugs the south Texas coast
from Carpus Christi to Brownsville.
Commercial development busies the
north and south ends of the island but
sand beaches and love dunes form the
only skyline along the seashore itself,
which ranges from a few hundred
yards to three miles in width.
The intercoastal waterway, Laguna
Maufre, wasties the western store. The
Old of Mexico whitecaps the eastern
store. Campers and day-tourists can
visit the Seashore in warious ways, all
of them displayed at the park headquarters on the Corpus Christ side of
the island causeway to the north, and at
the information center on the island
itself.

itself.

Recreational vehicles can use the 140-site paved campground near the ranger station, but they must go to Nueces County Park north of the Seashore or Cameron County Park south near Port Isabel for hook-up facilities. They can be parked or driven with other ordinary vehicles on the

first five miles of firm sand beach.

Only four-wheel drive vehicles can wheel beyond this point because soft sand and shell beds quickly trap wheels in the beach. Even these are regularly towed out of the sand by rescuers who drive or fly in from the mainland. (You can also drive north about five miles from the park's southern entrance at Port Isabel before you must switch to four-wheel drives.)

This is not a travel experience for those who like their fun wrapped in city streets and music, but it is a haven for those who dream of standing alone in the world with a fishing rod, or sharing the land with the birds. Beyond the 14-mile marker, the Seashore shares a whited world with the birds and a few lone travelers. A 100-yard strip of sand tracks a straight line to the horizon between whitecaps and dunes.

one outzon between whitecaps and dunes.

Long-legged sandpipers prance the waters edge. Clusters of black-headed Caspian terns rise together if they are startled. A skimmer flies with his low-er beak underwater to each fish. Occasionally, a single great blue heron raises its head to form a skyline along the beach.

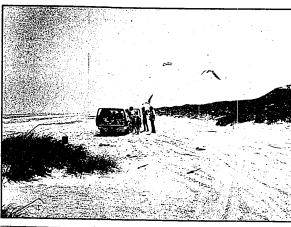

Snakes are here but seldom seen. Coyotes prowl the sea edge at dawn. A sharp whistle and an airborne chuck of bread brings the gulls, circling and div-

bread orings the guist, circuing and oning for dinner slow season, October to
May, or on weekdays during summer,
you can drive for miles with only a
camper's lean-to breaking the wilderness or a line of fishing poles stuck hiltdown at water's edge waiting for redfish

At the 24-mile marker, wheel tracks turn inland to the rotting corrals whereranches once were worked. Near the'
55-mile marker, you can still see the;
usted wreck of the Nicaragua, shoaledthere in 1912.
Overnight camping is allowed all
along this wilderness beach, although
foot traffic is not allowed on the dunes.
Trampling feet kill the plants that bold
the dunes together and protect them
from the wind.

The Spaniards called this lovely lonely place Las Islas Blancas, the white islands. If you can get excited about a day or a weekend on the open beach, with the sea running away to the horizon and the seaguils eating bread youthrow into the sky, this is the place.

But don't go during or just after a full moon, when the tides are high. The birds have learned to pick their way among the beer cans and the bleach bottles, but you probably won't like it a bit.

The only invaders now are tourists, although the natural landscape and the National Park Service limit what we can do to violate the land. . . Commerical development busies the north and south ends of the island but sand beaches and low dunes form the only skyline, which ranges from a few hundred yards to three miles in width.

Shades of '1984'

DALLAS, Tex. — I seldom hear about foreign travelers strug-ing through the logistics of travel in the U.S. I think about it was I try to find my way around Dallas-Fort Worth Interna-

sow as I try to find my way around Dallas-Fort Worth International Airport.

A modern airport is like a concrete city that spreads to indefinite boundaries. I have this same sensation in Frankfurt, London
and Chicago, a sense of walking though a time machine into a
world where everything is made of concrete and glass.

Poeple move down passageways into hollow-sounding rooms
where they are redirected to other passages, in the spirit of
Orwell's "1984."

Every airport has its own trap. Here, it is the Air Trans (Air
port Transportation), a system of rapid transit that runs in four,
color-coded loops between the gates of various airlines.

Imagine a European or an Asian who speaks as little English as
I speak German or French. Picture the person trying to find the
way from one plane to another.

The Air Trans are one level down by elevator from the main oor. I flew American to Dallas and would fly Braniff to Corpus

They American to Danas and would by Braniff to Corpus Christi, but the transfer is not that simple. A sign warns you to consult a posted schedule before you board because there are three different Braniff stops: Braniff A, B or C.

I was going to Braniff C.

I boarded the train with two Texans who also didn't know where they were going. On board was a man who said, "I just did the complete loop and I think I missed my plane."

As we were staring past the gaily colored seats to the tunnel walls outside, a voice came out of the wall, warning us to read the signs on the tunnel walls so that we would know where to get off.

Sounds easy enough if you can understand that wonderful Texas accent, but one nervous-looking foreign traveler sat staring out the window, frowning.

So here I am, checked in at last at Braniff C, and wiser by one more world airport. The moral of the story is not that it is really difficulty to awigate an airport, but that you need time and a sense of humor to figure out where you are going, and how to get there.

In Los Angeles, you ride endless moving ramps. In Seattle, you ride a horizontal elevator. In Chicago, you change terminals.

And just as you get one small portion of the world figured out, the airport becomes obsolete and they rebuild it.

FROM THE MAILBAG

Mary Schoen of Birmingham has added another place worth visiting to the list of things to see and do while traveling Interstate 75 to Florida.

"Westville is worth a visit," Mary says. "It's on the Anderson-ville Trail near Plains,"

Westville, 20 miles from Plains, Ga., is a collection of original Georgia buildings of the early 1800s. Buildings from early settlements in Georgia were authentically restored, furnished and placed in a village setting.

Tourists can wander through the houses and shops, have lemonade and cookies, and talk to authentically constumed guides about the history represented.

One of the purposes of Westville is to preserve the handicrafts and skills of West Georgia during the mid-19th century, so crafts are usually being practiced at the site.

Westville is just outside the town of Lumpkin, where the re-stored Bedingfield Inn graces the town square.

CHANNEL 56 has launched its travel season for armchair tra-velers on Mondays. The "Explorer Series" will show climbers on the Swiss Alps tonight, May 7; gold in Ecuador, May 14; the as-sault on Mount McKinely, May 21; and skiers on the Sierra Neva-das, May 28. All are at 7:30 p.m.

The "World Series" will also show Australia at 9 p.m. tonight and the University of Rome at 9 p.m. Monday, May 14.

A new group of documentaries, called "Views on Asia," starts May 21 with Indonesia and continues May 28 with Thailand. Finally, the Cousteau Odyssey at 8 p.m. Monday, May 27.

Guidelines for the budget-minded

For travelers on a shoestring, the 1973-90 edition of "The Budget Travelers on a shoestring, the 1973-90 edition of "The Budget Travelers of the State America" is out. The suddebook sading a fortune without spending a fortune. It's written by the Council on International Educational Exchange, a major student travel corganization which is dedicated to helping people travel economically and wisely.

The book is set up country by country, with information on where to stay and eat interpressively, what to see and do in major cities, small towns and she the resorts, and hins on how and where to meet people.

We it also includes practical matters Gucha she sallh and entry requirements, cheap but comfortable transportation, drug laws, geography, boating on the Amazon, snorkeling on a Mexican beach, visiting the ruins at Machu Pic-chu or disco dancing in Rio De Janeiro.

YOUR FOUR-WHEEL-drive vehi-cle, which can be rented from opera-tors like Jerry Foy of Corpus Christi, enters the northern Seashore from Malaquite Beach. The first lew miles are smoothed and cleared of debris for the 750,000 visitors who come here eve-ry year. Mexico a bargain in the summer

Summer is off-season in Mexico.

Ontario tax break in effect to 1981

Ontario's 7 percent accommodation retail sales tax will remain suspended until March 31, 1981, according to Larry Grossman, the province's indus-try and tourism minister.

"Continued suspension of the retail tax on tax-le accommodation and meals under the American Plan is aimed at stimulating the province's hos-pitality industry," he said.

"American tourists will also benefit from the de-valued Canadian dollar with the American dollar now favored with an exchange rate of about 15 percent."

about sports

"Superfan" Ron Cameron gives you a chance to prove it.

Telephone Ron "on the air" any night, lelephone Ron 'on the air' any night, Monday through Saturday, from 6 to 8 PM and "tell it like it is." The sports fans point-of-view is what his show is all about. Special guests from the world of sports are on hand to give you a real "inside look" at your favorite sport. Athletes, coaches, umprise, owners and other sports guests to the sport of the spo owners and other sports guests give you, the fan, a chance to get the "straight skinny." You'll hear sports facts and opinions that you can't get anywhere else. Listen to WXYZ TalkRadio...for a real live change.
