Although it's one of the most awesome structures in the world, a nuclear
powerplant generates electricity in the
same way as plants powered by fossil
fuels such as coal.
Heated water becomes steam, steam
drives a turbine that spins a generator generator produces electricity.
But unlike its fossil ned counterpart,
the heat source for a nuclear plant is
the tremendous energy released from
the fission, or splitting, of the nuclei of
fissionable materials, principally Uranium 235 points out, a major article on
nuclear energy in the April National
Geographic.

ONCE OPERATIONS begin in a typical pressurized water reactor — such as the controversal Three Mile Island nuclear power plant near Middletown, Pa. — the reactor's core rods are

immersed in water. Thousands of tons of water circulate under high pressure to carry away the heat. Any interference with this flow is, as the past few weeks have shown, potentially dangerous.

ous.

Even after the plant is shut down, radioactive decay from fission products in the fuel rods continues to produce substantial heat. Consequently, cooling water is still needed.

water is still needed.

In a pressurized water reactor — the
most common in the United States today — energy from the chain reaction
of fissioning uranium in the reactor
core (1) heats the surrounding water,
which is pumped under pressure into
the tubes of a steam generator (2) to
heat the water lineady in the generator.

Heat from the tubes converts water
in the generator to steam, whose ener-

gy turns the rotors of a high-pressure turbine (3). Lower-energy steam proceeds to low-pressure turbines (4,5), and electric generator (6) converts the energy from the whirming turbine shart considerable to the considerable of the considerable of the considerable of the considerable of a condense (8) and is converted to water, which returns to the steam generator. Water from the reactor's condenser (6) and is converted to water, which returns to the steam generator. Water from the reactor's condenser from the reactor's condenser for the considerable of the condenser for repeated use.

Small amounts of river water (10) are piped to the condenser coils to replenish water to sib ye vaporation in the cooling tower.

power plant and the thing that keeps everything ticking is the reactor core (1) surrounded by water and comprised of fuel assemblies containing about 100 tons of uranium dioxide. The rate of fission in the powerful packet is con-trolled by neutron-absorbing rods (11).

fission in the powerful packet is con-trolled by neutron-absorbing rods (11). Core and water are contained in a heavy steel pressure vessel (12). It, in turn, is shielded by concrete walls five to 10 feet thick (13), and the whole thing is topped off by a steel-and-con-crete containment structure (14) to pre-vent radjacetivity from escaping. vent radioactivity from escap

(9) — and returned to the condenser for repeated use.

Small amounts of river water (10) are piped to the condenser coils to repletinsh water lost by evaporation in the cooling tower.

BUT THE HEART OF a nuclear in a separate facility on the site (16).

#### THE REYNOLDS COMBINE!

Newest Member in the Reynolds Famil of Quality Water Conditioning Products. The Combine is a combination of three

water conditioners—

• It softens the water.

• It removes the iron and rust

• It fillers out the cloudy
yellow and turbidity.

This is no ordinary "water conditioner"-the Combine is completely unique for
the purpose of solving real water prob-

tems.

The Combine is available in Cabinet
Models, Compact Models, and 2-tank
all fiberglass models-in a size for all homes and small commercial applications

Stedman's

### Hawks top Western

Farmington Harrison's Barry Leshman won the No. 1 singles match with a 45, 6.5 showing over Doug Poland to help the Hawks whip Walfed Lake Monday, Walfeld Lake Central defeated help the Hawks whip Walfed Lake Farmington High, 5.2, in the Interest State Lakes League, Farmington 18 to 2.3 inversil and 4.6 in the WSL. 542 oversil and 4.6 in the WSL. 542 oversil and 4.6 in the WSL. 542 oversil and 4.6 in the WSL. 543 oversil and 4.6 in the WSL. 544 in the No. 3 singles contest. 545 oversil and MSL below 18 oversil and 18 oversil

Campana needed three sets to stop Dave Hawthorne, 4-6, 6-3, 6-2, in the No. 3 singles contest. Earlier, Harrison defeated Livonia Churchill, 6-1, in another Western Six meet. In the No. 3 doubles match, Harrison's Andre Berk and Narendra Bhagat downed John Panzo and Pete

in ILI. meets.
Farmington's Dan Page whipped
Ray Ejups, 7-5, 6-4, in the No. 3 singles
match. In No. 2 doubles, Farmington's
Jim Boston and Bud Ferrer beat Imants Ejups and Bill Patrick, 7-6, 7-6.
Earlier, Livonia Stevenson blanked
Farmington, 7-0. Jim Pfeffer stopped
Page, 6-1, 6-1, in No. 1 singles.
On Thursday, May 10, Harrison plays
at North Farmington. On Friday, North
entertains Westland John Glenn, and
Farmington entertains Pontiae Northern. All meets begin at 4 p.m.

NOTICE TO ELECTORS AND TAXPAYERS
OF THE CITY OF FARMINGTON
OF INTENT TO ISSUE BONDS
SECURED BY THE CITY'S TAXING POWER
AND RIGHT OF REFERENDUM

PLEASE TAKE NOTICE that the City Council of the City of Farmington intends to authorize the issuance and sale of Special Assessment Bonds of the City, in the principal amount of not to exceed the Hunderd Two Thousand Dollars (1812,000), for the jurpose of paying the special assessment district's share of the cost of tocal public improvements in the City.

SOURCE OF PAYMENT
OF SPECIAL ASSESSMENT BONDS
THE PRINCIPAL AND INTEREST OF SAID SPECIAL ASSESSMENT BONDS
THE PRINCIPAL AND INTEREST OF SAID SPECIAL ASSESSMENT BONDS
tall be payable primarily from collections of an equal amount of special assessing and the bodes shall also plotego the full faith and restile of Farming-

shall be payable primarily from collections or an equas amount as performents and the bonds shall also plodge the full faith and credit of the City of Farmington.

In case of the insufficiency of said special assessments the principal and interest on said bonds shall be payable from the general funds of the City or any other resources available for payment.

Said bonds will be payable in BOND TERMS

Said bonds will be payable in the occeed on amount installments and will be offered for said at a maximum installments and will be cliented for said at a maximum installation.

THES SPECIAL ASSESSMENT BONDS will be Issued without vote of the electors unless a petition signed by not less than 10% of the registered electors of the City is filled with the City Council within foreythve (64) days after publication of this Notice by depositing same in the office of the City Cierk. If such a petition is filled, the bonds may not be issued unless approved by a majority vote of the electors of the City THIS NOTICE is given pursuant to the requirements of Section 5(g) of Act 279, Public Acts of Michigan, 1909, as amended.

Additional information may be obtained from the offices of the City Cierk.
