Its Farmington Founder's

Police sharpshooters show firearm skills

The 15th annual Farmington Founders' Festival will present the Farmington Hills Police Department's Firearms Demonstration Friday and Saturday, July 27 and 28.

The demonstration will feature members of the pistol team and department officers displaying expertise and safety techniques in the use of firearms.

The hour-long shows are to begin at 11 a.m., 2 and 4 p.m. Friday and 1, 3 and 5 p.m. Saturday in the Farmington Hills police pistol range, located off Grand River behind Chrysler's Farmington Engineering Laboratories, just east of Farmington Road.

Department regulations require all Farmington Hills police officers to pass a

combat course twice a year. The course involves a test of shooting skills and accuracy, firing at stationary targets from distances of seven to 50 yards.

The demonstration will involve handguns, shotguns, machine guns and rifles. Officers will demonstrate accuracy through the use of handguns fired at small moving targets and will include several trick shooting displays.

One such trick display involves officers shooting from an upside-down position, hitting small clay pigeons. Another trick involves sighting handguns through mirrors.

The hour-long demonstrations will consist

HIGH BLOOD PRESSURE AND CHIROPRACTIC

When blood pressure is not within normal range, a very common treatment is to prescribe a drug which controls the blood pressure by one of many mechanisms. The drug may work directly on the nerve system, or in reference to kidney function. Sometimes the drug is a combination of these two factors.

The effort in natural health care is to determine why the blood pressure is abnormal and to remove that underlying cause, thus avoiding the possible harmful side effects of drugs.

These natural methods include evaluating the nervous system, which controls and coordinates every function of the body and a complete nutritional analysis.

BLOOD PRESSURE NORMAL AGAIN WITHOUT DRUGS

Over twenty years ago, I discovered that I had high blood pressure and have been taking medication ever since to lower it. However, it fluctuated constantly, much to my discomfort. A friend of mine suggested I see a doctor of Chiropractic. I attended one of the free lectures at the Harp Chiropractic Clinic and learned how Chiropractic could help. I made an appointment to see Dr. Harp and after fourteen days, my blood pressure dropped gradually from 196/124 to 138/80 and has maintained at that level for over a year without medication.

In conjunction, the treatments also helped my glaucoma. The pressure in my eyes dropped from 46-47 to 23-20. Even though I'm still taking my eye medication, there is a marked improvement.
