Proud Of His Dad

Dad was telling the folks at home about a fight he saw down town. He said: "One fellow hit the other one with a club and nearly knocked his brains out."

The young hopeful of the family, proud of his dad, said: "They couldn't knock any brains out of your head, could they, dad?" He meant to be complimentary but it didn't turn out just that way. But if Dad has an account at our Bank, we'll say he has some brains in his head, and is probably smart enough to keep them there, too. It requires more brains to SAVE money than it does to EARN it or to SPEND it.

Chinese Think Little of Women.
Of so little account is woman in China that a father, if asked the number of his children, will probably leave out the girls in his reckoning. In the very great majority of cases the girls are not taught to read or write, for the simple reason, as the men would say, that it is useless for girls to learn to read. All the restrictive customs are based on the idea that woman is a being inferior to man.
