

The Sucker List

The postal authorities recently arrested some fraudulent promoters and seized their beautifully engraved certificates, and what was reported to be "the most valuable list in existence."

That list contained the names of 100,000 people who had a reputation for being "suckers."

Of course your name isn't on that list, but ARE YOU SURE that your money can't be lured into companies whose assets are only beautifully engraved certificates?

Do you realize that your money is ABSOLUTELY SECURE when deposited here and that anytime you ask for it you can get it back, plus the interest earned?

Milk Snake Harmless.

The house or milk snake is a handsome and mild-tempered, cat-like snake, very abundant in farming districts, where it frequently enters houses, probably in search of mice rather than for the purpose of drinking milk, as is popularly believed.

A Feast Fit for the Gods!

That's what you'll say if you ever eat turkey cooked in one of our roasters!

We have studied this subject of cooking utensils until we know it, and we have several appliances in stock we want to show you.

All the goodness, all the flavor in your meats and vegetables is retained when you use these up-to-date utensils. Real honest-to-goodness cooks will not do without them.

There's lots of competition in the manufacture of these utensils now, and prices are much more reasonable than they were.
