Ford

THE UNIVERSAL CAR

That Dependable Ford Quality

FORD durability began back in 1903 when Henry Ford started experimenting with Vanadium steel and heat-treating processes. He knew that a more exact tempering of steel for motor car building must be worked out. Vanadium, it was learned, when added to molten steel, gives to that steel a greater toughness and adhesiveness. And now other alloys have been found which are superior to Vanadium. With the Ford Motor Company constant progress is the daily companion. The Ford products—Car, Trucks, Tractor—grow nighly daily. Heat-treating tempers each part so that it will best withstand the wear or tear to which it is subjected. Ford chemists and analysts have created formulas and standard specifications for every individual part of the Ford car—not only for the steel but for everything from pneumatic tires to top.

Ford durability isn't a matter of accident, it is a matter of painstaking thoroughness in laboratory and factory. The Ford car is a car of precision—of standardized values. Order your Ford car now. No matter how fast they may be made the demand multiplies faster. Order today for we can make fairly prompt deliveries—Runabout, Touring Car, Coupe, Sedan, Truck and Fordson Tractor.
